## PROFESSIONAL EXPERIENCE

Mr. Luke has a comprehensive civil engineering background. He has been managed and designed residential and industrial subdivisions, site development, and infrastructure including roadway, water, sewer, drainage, electrical, landscape architecture for resorts and airfields. Throughout his career, Mr. Luke has led the design for major infrastructure and sitework projects of varying size and complexity. He has also managed large building projects and provided the design support services for large-scale projects during construction.

Mr. Luke has management and design experience for large infrastructure projects and has strong relationships with many Federal, State, and City agencies a few include the City DPP, Board of Water Supply, State DOT, DLNR, SHPD, and DTS. He has also worked closely with contractors, vendors and the owner in coordinating design and construction of major Hawaii infrastructure projects.
