EXECUTIVE SUMMARY

The gross domestic product (GDP) in a region is the monetary value of all goods and services produced within the geographic area of the region in a particular period of time. It is the broadest quantitative measure of a region’s total economic activity.

Top Five Industries: Hawaii and the U.S.

In this study, the economies (national, state, and county) are divided into 20 industry groups based on roughly the two-digit North American Industry Classification System (NAICS) code. The state of Hawaii generated approximately $97.3 billion of nominal GDP in 2019. The real estate and rental and leasing sector generated the most GDP at about $19.8 billion or 20.3%; followed by government at about $19.1 billion or 19.7%, accommodation and food services at about $8.8 billion or 9.1%, health care and social assistance at about $6.6 billion or 6.8%, and retail trade at about $6.2 billion or 6.4%. The top five groups in Hawaii accounted for 62.2% of total nominal GDP in 2019. The same five groups in the U.S. accounted for 41.8% of total GDP in 2019. The top five groups in the U.S. in 2019 were real estate and rental and leasing, government, manufacturing, professional, scientific, and technical services, and finance and insurance. The top five groups in the U.S. accounted for 51.9% of total nominal GDP in 2019, and the same five groups in Hawaii accounted for 49.5% of total GDP in 2019. Based on GDP for the top five industry groups, Hawaii’s economy is more concentrated than the U.S. economy.

The gap for 2019 GDP share between Hawaii and the U.S. was the largest for the government group, with the share of Hawaii above that of the nation by 7.4 percentage points; followed by real estate and rental and leasing by 7.0 percentage points, and accommodation and food services by 6.0 percentage points. On the other hand, the share of Hawaii’s manufacturing was below that of the nation by 9.1 percentage points; followed by finance and insurance by 4.0 percentage points, and professional, scientific, and technical services by 3.7 percentage points.

Top Five Industries: Counties in Hawaii

The top five industry groups that generated the most GDP in 2018 by respective county are provided in Table S2. Economies in neighbor island counties are more concentrated in tourism. Accommodation and food services industry appeared among the top five industry groups in all neighbor island counties.

Top Five Contributors to Economic Growth 2001-2019: Hawaii and the U.S.

From 2001 to 2019, total real GDP (in 2012$) for the state of Hawaii increased approximately $27.5 billion. The real estate and rental and leasing sector contributed the most to real GDP at about 27.8%; followed by government at about 12.8%, health care and social assistance at about 8.9%, transportation and warehousing at about 8.7%, and retail trade at about 7.1%. The top five groups in Hawaii accounted for 65.2% of total additional real GDP from 2001 to 2019. The same five groups in the U.S. accounted for 37.4% of total additional real GDP from 2001 to 2019. The top five groups in the U.S. accounted for 61.5% of total additional real GDP from 2001 to 2019, and the same five groups in Hawaii accounted for 47.2% of total additional real GDP from 2001 to 2019.

May 2020
The large contribution to economic growth in Hawaii by the real estate and rental and leasing sector was partially due to the rapid growth of imputed rent, which does not create additional jobs in the economy. From 2001 to 2018, the imputed rent in Hawaii increased about $3.3 billion or about 10.6% per year on average. In comparison, total nominal GDP for the real estate and rental and leasing sector excluding imputed rent increased only about $8.1 billion or 4.8% per year on average during the same period.

The difference in real GDP contribution between Hawaii and the U.S. was the largest in real estate and rental and leasing, with the share of Hawaii above that of the nation by 13.2 percentage points; followed by government by 8.9 percentage points, and transportation and warehousing by 5.7 percentage points. On the other hand, the share of Hawaii’s manufacturing was below that of the nation by 9.3 percentage point; followed by information by 9.0 percentage points, and professional, scientific, and technical services by 7.2 percentage points.

From 2001 to 2018, Honolulu's share of total state nominal GDP decreased, while the shares of all the other counties increased. Honolulu's share of nominal GDP decreased from 76.7% to 73.8%, Maui's share increased from 9.6% to 11.5%, Hawaii County's share increased from 9.2% to 9.8%, and Kauai's share increased from 4.5% to 4.9%.
I. INTRODUCTION

The gross domestic product (GDP) in a region is the monetary value of all goods and services produced within the geographic area of the region in a particular period of time. It is the broadest quantitative measure of a region’s total economic activity and is one of the most observed economic indicators by policy makers, businesses, and the public.

Research Objectives

This study analyzes the structural changes for the economies of the nation, the state, and the respective counties between 2001 and 2019 (2018 for counties) using the GDP by industry data. This period covers the most recent two business cycles. The comparisons identify industry advantages and economic diversification across the three geographic levels.

Data Sources and Definitions

The primary data source for this report was the U.S. Bureau of Economic Analysis (BEA). This data includes GDP by industry data for three geographic levels (nation, state, and county). The data is analyzed using two-digit North American Industry Classification System (NAICS) codes from 1997 to the latest year available (2019 for the state and national level).

In the BEA’s GDP by County Account, GDP from 2001 to 2018 are available at the 2-digit NAICS level for Honolulu and most of the 2-digit NAICS level for Maui. GDP for some of the 2-digit NAICS level for Hawaii County and Kauai County are not available. The missing GDP data at the 2-digit NAICS level for Hawaii County and Kauai County are estimated based on the two counties’ shares of earnings calculated from the BEA’s Personal Income and Employment Account and data from Economic Modeling Specialists, Inc. (EMSI).

The values included in this study are defined using BEA definitions. GDP by state is the measure of the market value of all final goods and services produced within a state in a particular period of time. In concept, an industry’s GDP by state, referred to as its "value added", is equivalent to its gross output (sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (consumption of goods and services purchased from other U.S. industries or imported). GDP by state is the state counterpart of the Nation’s GDP, the Bureau's featured and most comprehensive measure of U.S. economic activity.

Real GDP is an inflation-adjusted measure of gross product. The real estimates of GDP are measured in chained (2012) dollars.

Major Industry Groups of the Economy

Based on the data availability, the economy is grouped into 20 industry groups based on roughly the two-digit NAICS code. As shown in Table 1, in 2019, the state of Hawaii generated approximately $97.3 billion of nominal GDP. Real estate and rental and leasing generated the most GDP at about $19.8 billion or 20.3%; followed by government at about $19.1 billion or 19.7%, accommodation and food services at about $8.8 billion or 9.1%, health care and social assistance at about $6.6 billion or 6.8%, and retail trade at about $6.2 billion or 6.4%. The top five groups accounted for 62.2% of total nominal GDP in 2019.
The large share of real estate and rental and leasing of GDP is partially due to the inclusion of imputed rent in this sector. Without imputed rent, the real estate and rental and leasing GDP share would be much smaller. Imputed rent does not create many jobs. In fact, in 2018 the share of real estate and rental and leasing sector of total compensation of employee was only 1.8%.

II. INDUSTRY STRUCTURAL CHANGE: HAWAII STATE

Changing Industrial Structures in Hawaii

The industrial structure in terms of GDP has changed over time. As shown in Figure 1, from 2001 to 2019, 14 of the 20 sectors lost their respective share of total nominal GDP, and six sectors gained respective share of nominal GDP. The real estate and rental and leasing sector gained the most, followed by transportation and warehousing, construction, health care and social assistance, and administrative and waste management services. The retail trade sector lost the most, followed by government, other services, except government, wholesale trade, and information.

Table 3 shows the changes in the GDP shares of the four tourism intensive industries between 2007 and 2019 for the state of Hawaii. From 2007 to 2019, the total share of the four tourism intensive industries decreased only slightly from 23.1% to 22.1%. The shares of retail trade, accommodation and food services, and arts, entertainment, and recreation decreased, while the share of the transportation and warehousing sector increased slightly.

Source: BEA and DBEDT, READ.
Although the two tourism intensive industries – Accommodation and food services and Retail trade lost shares of GDP between 2001 and 2019, they were still among the top five industries in terms of nominal GDP in 2019.

**Sector Contribution to Real GDP Growth**

From 2001 to 2019, total real GDP in Hawaii (in 2012$) increased $27.4 billion or about 49.1%. As shown in Figure 2, from 2001 to 2019, the real estate and rental and leasing sector contributed the most at 27.8% of additional real GDP, followed by government at 12.8%, healthcare and social assistance at 8.9%, transportation and warehousing at 8.7%, and retail trade at 7.1%. The top five industry groups together contributed about 65.2% of total additional real GDP from 2001 to 2019.

The sector contributions of real GDP during the past two expansion cycles: 2001-2007 and 2009-2019 varied slightly. From 2001 to 2007, total real GDP (in 2012$) in Hawaii increased about $15.2 billion or about 27.1%. As shown in Figure 3, from 2001 to 2007, the real estate and rental and leasing sector contributed the most at 24.0% of additional real GDP; followed by government at 14.6%, construction at 11.3%, transportation and warehousing at 8.5%, and accommodation and food services at 7.9%. The top five industry groups together contributed about 66.4% of total additional real GDP from 2001 to 2007.

**FIGURE 3. CONTRIBUTION OF ADDITIONAL REAL GDP FROM 2001 TO 2007 IN HAWAII**

- Real estate and rental and leasing: 24.0%
- Government: 14.6%
- Construction: 11.3%
- Transportation and warehousing: 8.5%
- Accommodation and food services: 7.9%
- Retail trade: 6.4%
- Information: 5.2%
- Professional, scientific, and technical services: 5.1%
- Health care and social assistance: 4.5%
- Administrative and waste management services: 3.6%
- Finance and insurance: 3.5%
- Wholesale trade: 2.4%
- Utilities: 1.7%
- Educational services: 0.6%
- Arts, entertainment, and recreation: 0.3%
- Other services, except government: 0.2%
- Manufacturing: 0.2%
- Mining: 0.1%
- Management of companies and enterprises: 0.1%
- Agriculture, forestry, fishing, and hunting: -0.3%
From 2009 to 2019, total real GDP in Hawaii increased about $14.4 billion or about 20.9%. As shown in Figure 4, from 2009 to 2019, the real estate and rental and leasing sector contributed the most at 26.5% of additional real GDP; followed by accommodation and food services at 12.9%, transportation and warehousing at 9.7%, retail trade at 9.9%, and health care and social assistance at 9.3%. The top five industry groups together contributed about 68.4% of total additional real GDP from 2009 to 2019. Tourism intensive industries contributed much more to the economic growth during the current expansion (2009-2019) at 35.5% than the previous expansion (2001-2007) at 27.8%.

Table 4 shows the state level real GDP (in 2012$) by sectors. From 2001 to 2007, total real GDP increased 4.0% per year on average. Among the 20 sectors, only the agriculture, forestry, fishing, and hunting sector had negative growth in real GDP. From 2009 to 2019, the annual average growth rate of total real GDP decreased to 1.9%. Three of the 20 sectors had negative growth. From 2001 to 2019, the annual average growth rate of total real GDP was 2.2%. Two of the 20 sectors had negative growth.

III. INDUSTRY STRUCTURAL CHANGE: COUNTIES IN HAWAII

County Shares of State GDP by Industry

From 2001 to 2018, the Honolulu share of total state GDP decreased, while the shares of all the other counties increased. As shown in Figure 5, from 2001 to 2018, Honolulu's share of nominal GDP decreased from 76.7% to 73.8%, Maui's share increased from 9.6% to 11.5%, Hawaii County's share increased from 9.2% to 9.8%, and Kauai’s share increased from 4.5% to 4.9%.

FIGURE 5. COUNTY’S SHARE IN STATE NOMINAL GDP, 2001-2018
As shown in Table 5, in 2001, Honolulu’s share of state nominal GDP ranged from 54.7% for accommodation and food services to 88.5% for educational services. Twelve of the 20 sectors in Honolulu had shares above Honolulu’s share of total nominal GDP. Maui’s share of state nominal GDP ranged from 3.8% for wholesale trade to 21.7% for arts, entertainment, and recreation. Five of the 20 sectors in Maui had shares above its share of total nominal GDP. Hawaii County’s share of state nominal GDP ranged from 2.8% for finance and insurance to 25.1% for agriculture, forestry, fishing, and hunting. Seven of the 20 sectors in Hawaii County had shares above the total nominal GDP share. Kauai’s shares of the state nominal GDP ranged from 1.6% for manufacturing to 10.5% for accommodation and food services. Eight of the 20 sectors in Kauai had shares above the total nominal GDP share.

As shown in Table 6, in 2018, Honolulu’s share of state nominal GDP ranged from 25.9% in agriculture, forestry, fishing, and hunting to 93.9% in mining. Twelve of the 20 sectors in Honolulu had shares above Honolulu’s total nominal GDP share. Maui’s share of state nominal GDP ranged from 1.6% in mining to 19.3% for accommodation and food services. Eight of the 20 sectors in Maui had shares above Maui’s total nominal GDP. Hawaii County’s share of state nominal GDP ranged from 0.4% in mining to 54.9 in agriculture, forestry, fishing, and hunting. Eight of the 20 sectors in Hawaii County had shares above its total nominal GDP share. Kauai’s shares of state nominal GDP ranged from 2.3% for manufacturing to 12.0% for agriculture, forestry, fishing, and hunting. Ten of the 20 sectors in Kauai had shares above Kauai’s total nominal GDP share.

As shown in Table 7, from 2001 to 2018, Honolulu’s share of total nominal GDP decreased 2.9 percentage points. In seven of the 20 sectors, Honolulu’s shares increased. The mining sector increased the most at 19.4 percentage points; followed by construction, manufacturing, accommodation and food services, management of companies and enterprises, and information. The agriculture, forestry, fishing, and hunting sector in Honolulu lost the most at 33.3 percentage points; followed by other services, except government, and finance and insurance. From 2001 to 2018, Maui’s share of total nominal GDP increased 1.9 percentage points. In ten of the 20 sectors, Maui’s shares increased. The retail trade sector increased the most at 5.6 percentage points, while the mining sector lost the most at 6.7 percentage points. Hawaii County’s share of total nominal GDP increased 0.5 of a percentage point. In 15 of the 20 sectors, Hawaii County’s shares increased. The agriculture, forestry, fishing, and hunting sector increased the most at 29.8 percentage points, while the mining sector lost the most at 8.4 percentage points. Kauai’s share of total nominal GDP increased 0.5 of a percentage point. In 14 of the 20 sectors, Kauai’s shares increased. The finance and insurance sector increased the most at 6.7 percentage points, while the mining sector lost the most at 4.4 percentage points.

County Industrial Structure and Sector Contribution to Real GDP Growth

City & County of Honolulu

As shown in Table 8, in 2018, Honolulu generated approximately $69.3 billion of nominal GDP. Government generated the most GDP at about $15.6 billion or 22.5% of total GDP; followed by real estate and rental and leasing at about $12.4 billion or 17.8%, accommodation and food services at about $4.9 billion or 7.1%, health care and social assistance at about $4.9 billion or 7.0%, and retail trade at about 4.2 billion or 6.0%. The top five groups accounted for 60.5% of total nominal GDP in 2018.

Table 9 shows the changes in the GDP shares of the four tourism intensive industries in Honolulu. From 2007 to 2018, the total share of the four tourism intensive industries remained about the same at 19.7% in Honolulu. The shares of retail trade and accommodation and food services decreased slightly, while the shares of other two sectors increased slightly.

Table 18 shows the changes in the GDP shares of the four tourism intensive industries in Kauai. From 2007 to 2018, the total share of the four tourism intensive industries decreased 3.7 percentage points from 36.0% to 32.3% in Kauai. Decreased shares in arts, entertainment, and recreation and accommodation and food services more than offset the increased share in transportation and warehousing.

IV. COMPARISON BETWEEN HAWAII AND THE NATION

Hawaii’s economic performance varied from that of the nation. As shown in Figure 6, from 2002 to 2010, Hawaii’s annual growth rates of nominal GDP and real GDP (RGDP) were mostly above that of the nation. From 2011 to 2014; however, Hawaii’s annual growth rates of nominal and real GDP were mostly below the national growth rates. In 2015 and 2016, the growth rates of nominal and real GDP in Hawaii were both above that of the nation. From 2017 to 2019, the growth rates of nominal and real GDP in Hawaii were both below that of the nation.

FIGURE 6. COMPARISON OF ANNUAL GDP GROWTH RATE, 2002-2019

Comparison of Industrial Structures

Hawaii’s economic structure varies from that of the nation. As shown in Figure 7, in 2001, the top 5 sectors that generated a majority of Hawaii’s nominal GDP were government (20.8%), real estate and rental and leasing (17.4%), accommodation and food services (9.6%), retail trade (8.0%) and health care and social assistance (6.2%). Together these sectors generated 62.0% of Hawaii’s total nominal GDP in 2001. In comparison, the same sectors generated only 41.3% of the U.S. total nominal GDP.

The largest gap (the share of Hawaii above the share of the U.S.) between Hawaii and the nation was in government (7.7 percentage points); followed by accommodation and food services (6.8

May 2020
percentage points), real estate and rental and leasing (4.9 percentage points), transportation and warehousing (1.4 percentage point), and retail trade (1.3 percentage point). The largest negative gap (the share of Hawaii below the share of the U.S.) was in manufacturing (11.8 percentage points); followed by finance and insurance (3.9 percentage points), professional, scientific, and technical services (2.4 percentage points), wholesale trade (2.1 percentage points), and information (2.1 percentage points).

**FIGURE 7. COMPARISON OF SECTORS’ SHARES OF NOMINAL GDP IN 2001**
As shown in Figure 8, in 2019, the top 5 sectors in Hawaii were real estate and rental and leasing (20.3%), government (19.7%), accommodation and food services (9.1%), health care and social assistance (6.8%), and retail trade (6.4%). Together these sectors generated 62.2% of Hawaii’s total nominal GDP in 2019. In comparison, the same sectors generated only 41.8% of the U.S. total nominal GDP in 2019. The largest gap between Hawaii and the nation was in government (7.4 percentage points); followed by real estate and rental and leasing (7.0 percentage points), accommodation and food services (6.0 percentage points), transportation and warehousing (2.3 percentage points), and construction (1.6 percentage point). The largest negative gap was in manufacturing (9.1 percentage points); followed by finance and insurance (4.0 percentage points), professional, scientific, and technical services (3.7 percentage points), information (3.1 percentage points), and wholesale trade (2.9 percentage points).

**FIGURE 8. COMPARISON OF SECTORS’ SHARES OF NOMINAL GDP IN 2019**
Comparison of Sector Contribution to Real GDP Growth

The sector contributions of real GDP growth from 2001 to 2019 are provided in Table 20. In Hawaii, the real estate and rental and leasing sector contributed the most to real GDP at about 27.8%; followed by government at about 12.8%, health care and social assistance at about 8.9%, transportation and warehousing at about 8.7%, and retail trade at about 7.1%. The top five groups in Hawaii accounted for 65.2% of total additional real GDP from 2001 to 2019. The same five groups in the U.S. accounted for 37.4% of total additional real GDP from 2001 to 2019. The top five groups in the U.S. are real estate and rental and leasing, information, professional, scientific, and technical services, health care and social assistance, and manufacturing. The top five groups in the U.S. accounted for 61.5% of total additional real GDP from 2001 to 2019, and the same five groups in Hawaii accounted for 47.2% of total additional real GDP from 2001 to 2019.

The gap between Hawaii and the U.S. was the largest for real estate and rental and leasing, with the share of Hawaii above that of the nation by 13.2 percentage points; followed by government by 8.9 percentage points, and transportation and warehousing by 5.7 percentage points. On the other hand, the share of Hawaii for manufacturing was below that of the nation by 9.3 percentage points; followed by information by 9.0 percentage points, and professional, scientific, and technical services by 7.2 percentage points.

The sector contributions of real GDP growth from 2001 to 2007 are provided in Table 21. In Hawaii, the real estate and rental and leasing sector contributed the most real GDP at about 24.0%; followed by government at about 14.6%, construction at 11.3%, transportation and warehousing at about 8.5%, and accommodation and food services at about 7.9%. The top five groups in Hawaii accounted for 66.4% of total additional real GDP from 2001 to 2007. The same five groups in the U.S. accounted for 23.9% of total additional real GDP from 2001 to 2007.

The gap between Hawaii and the U.S. was the largest for construction, with the share of Hawaii above that of the nation by 12.3 percentage points; followed by real estate and rental and leasing by 10.5 percentage points, government by 8.7 percentage points, accommodation and food services by 5.7 percentage points, and transportation and warehousing by 5.1 percentage points. On the other hand, the share of Hawaii for manufacturing was below that of the nation by 20.3 percentage points; followed by wholesale trade by 6.3 percentage points, information by 5.6 percentage points, health care and social assistance by 4.0 percentage points, and professional, scientific, and technical services by 2.9 percentage points.
