The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

My name is Doris Byun and I am testifying in support of the Honolulu Symphony project in Kakaako.

Honolulu Symphony is our future home and I can't wait for the building to be completed so that I can move in. Recent news reports have talked about the glass that is that is being used to build the project. I picked this building to live in because it will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

What I like about Honolulu Symphony's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that is conserves energy, incorporates workforce housing and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Honolulu Symphony's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

Comments/Questions

GLASS @ Symphony Tower much too glaring. I got a migraine headache when I walked around my Waimanu St bldg one day. I'm tired of HCDA always giving bldgs variances. Imagine when the glass shines on traveling cars It could temp blind the drivers. Please make the developer change the glass

Dear Chair Whalen and Members:

My name is Charlie Field and I am testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is my future home and I can't wait for the building to be completed so that I can move in. Recent news reports have talked about the glass that is being used to build the project, despite its energy-efficiency benefits. I picked this building to live in because it will be designed with sustainable living in mind, and believe that we should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

What I like about Symphony Honolulu's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that conserves energy, incorporates workforce housing, and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

Aloha,
Charlie Field

Dear Chair Whalen and Members:

My name is Arlan Chun and I am testifying in support of the Symphony Honolulu project in Kaka`ako.

My wife and I selected Symphony Honolulu for our future home and we can't wait for the building to be completed so that we're able to move in. Recent news reports have talked about the glass that is being used to build the project. We picked this building to live in because of its aesthetic design and sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

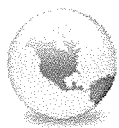

What we like about Honolulu Symphony's design is that we can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that conserves energy, provides a level of privacy from the exterior, incorporates workforce housing and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project built sustainably, with the materials that are already in place.

Thank you for your consideration of this matter.

Dear Chair Whalen and Members:

My name is Paul K. Kometani and I am testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is our future home and I can't wait for the building to be completed so that I can move in. Recent news reports have talked about the glass that is being used to build the project. I picked this building to live in because it will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

What I like about Honolulu Symphony's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that is conserves energy, incorporates workforce housing and promotes a sustainable lifestyle. It is critical that we each do what we can to preserve the land and all its resources. I understand that there are always other concerns to be aware of but I argue that sustaining the environment we live in is definitely at the top of the list.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project built sustainably, with the materials that are already in place.

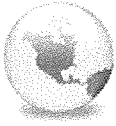

Thank you for your consideration of this matter.

Sincerely,

Paul K. Kometani

To Chairman Whalen an members,

I am writing to you in support of waiving or suspending the HAR §15-217-55(k)(2) of the Kakaako Mauka Area Rules. My wife and I both grew up in Hawaii with the dream of owning a piece of paradise by purchasing a home. I like to first show my appreciation of the work HCDA has done to transform Kakaako into an ideal urban neighborhood for local residents such as my wife and I to be able to have the opportunity to live in an area we can soon proudly call home. Symphony Honolulu is our future home and the fulfillment of our dream. So it is no surprise that recent news about the "glass rule" have us both very concern. I have read the submittals provided by OliverMcMillan and HCDA's own indepedent engineering consultant Douglas Engineering, both of which seems to suggested that the rule is not written with the definite intent to prevent reflectivity by requiring a base valve VLT of 50% or higher. Also having a lower VLT seems logical from a privacy but more importantly an e nvironmental standpoint. Letting less natural sunlight in would allow the homes to be cooler which will prevent the use of air conditioning, something that I would greatly appreciate from a comfort and an economical standpoint. Hawaii is already an expensive place to live as it is and not turning on the AC will help greatly in cutting down the resident's electrical bills. The extra disposable income means the possibility of that money being spent in surrounding Kakaako businesses. Buildings in Kakaako such as the Symphony Honolulu serves the housing needs of the working class such as my wife and myself that is sorely needed on this island and with this and the reasons above, I kindly request you to vote to keep the Symphony Honolulu's materials in place and to reconsider HAR §15-217-55(k)(2) of the Kakaako Mauka Area Rules at a later date so that it can be implemented definitively as the rule was meant to when it was first created.

Thank you so much for your time.

See Ming Yim

Dear Chair Whalen and Members:

My name is Randy A. Olson, I am testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is my future home and I can't wait for the building to be completed. Recent news reports have discussed the glass being used in the project. I chose this building because it is centrally located and designed with sustainable living in mind. It is important to take steps to save energy and incorporate our living space into Hawaii's environment in a responsible and efficient maner. The more we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

I really appreciate that Symphony Honolulu is designed to meet or exceed the U.S. Green Building Council's LEED energy savings standard, and look forward to living in the first brand new residential condo in Honolulu designed and built from the ground up as a "Green Building". I also look forward to the privacy and solar protection the current materials will provide.

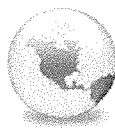

I strongly urge you to vote to preserve Symphony Honolulu's project as environmentally friendly and sustainable with the materials that are currently in place.

Thank you for your consideration of this matter.

Sincerely,

Randy A. Olson

Re: Symphony Glass Issue

Dear Chair Whalen and Members:

My name is Serge Krivatsy and I am testifying in *support* of the Symphony Honolulu project in Kakaako.

As a buyer of a unit in Symphony Honolulu I am looking forward to completion of what I feel will be one of the most desirable buildings in Honolulu. Recent news reports have talked about the glass that is that is being used to build the project. I chose to purchase a unit in this building because it will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

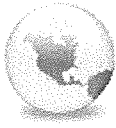

What I like about Honolulu Symphony's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that is conserves energy, incorporates workforce housing and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project built sustainably, with the materials that are already in place.

Thank you for your consideration of this matter.

I support waiving or permanently suspending the requirement of HAR §15-217-55(k)(2) for the Symphony Honolulu project and that such waiver or permanent suspension be retroactive from April 5, 2015 for two reasons.

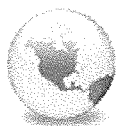

1. There is a conflict in rules and the project cannot obey two rules at the same time. It has been shown that no commercially available tower glass can meet both VLT and LEED standards.
2. Because the windows are in place to the 30th floor it would be such a waste of time and resources to replace the windows.

Moving forward is a great thing for Honolulu. Why are there always so many obstacles? The rules cannot be changed in the middle of the game.

The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

This is a written testimony in support of the Symphony Honolulu project in Kakaako.

Hawaiiana Management Company, Ltd. is the Association management company for Symphony Honolulu, and our company manages over 600 properties in the State of Hawaii, many of which are located in Honolulu. Symphony Honolulu is designed with sustainable living in mind by installing a high performance glass that reduces the transmission of the sun's heat into the residences, helping to reduce energy consumption, and maintain privacy and interior comfort within the Symphony residences. With respect to glazing and the effort of the community to "build green", these considerations should be paramount.

Numerous buildings that have been built years ago in Honolulu are facing major upcoming multi-million dollar decisions by its Board and residents to replace existing glazing and windows to upgrade to high performance glass. Yacht Harbor Towers, Mount Terrace, and One Waterfront are just the first examples.

In many of the Board meetings that our managers sit in, the greatest concern of residents to promote for upgrades in tower glazing and window replacement is to reduce the transmission of the sun's heat into the residences, which helps energy efficiency.

I kindly urge you to consider the request before you and vote to keep Symphony Honolulu's project built with the materials that are already in place, which helps to conserve energy and promote a sustainable lifestyle. Mahalo for your consideration.

Sincerely,

HAWAIIANA MANAGEMENT COMPANY, LTD.

Mike Hartley
President

Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

My name is Reid Okumura and I am testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is my future home and I can't wait for the building to be completed. Recent news reports have discussed the glass that is being used to build the project. I chose this building because it is centrally located and will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

I really like that Symphony Honolulu is designed to meet or exceed the U.S. Green Building Council's LEED energy savings standard, and look forward to living in the first brand new residential condo in Honolulu designed and built from the ground up as a "Green Building". I also look forward to the privacy that the current materials will provide.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

Sincerely,

Reid Okumura

Recent news reports have talked about the glass that is that is being used to build the project. I picked this building to live in because it will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

What I like about Honolulu Symphony's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that is conserves energy, incorporates workforce housing and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project built sustainably, with the materials that are already in place.

Thank you for your consideration of this matter.

The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

My name is SCOTT HEE WAI and I am testifying in support of the Honolulu Symphony project in Kakaako.

Honolulu Symphony is our future home and I can't wait for the building to be completed so that I can move in. Recent news reports have talked about the glass that is that is being used to build the project. I picked this building to live in because it will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

What I like about Honolulu Symphony's design is that I can bring in Hawaii's natural sunlight and enjoy the environment that surrounds me, while living in a building that is conserves energy, incorporates workforce housing and promotes a sustainable lifestyle.

I strongly urge you to consider the request before you and vote to keep Honolulu Symphony's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

I support the continuing construction of The Symphony Honolulu. I would like to see the project finish on time. There is too much community input for selfish reasons. There is no way that the VLT can accomplish keeping the building cool by LEED standards and keeping the rooms bright by VLT standards. Because the developer began the project with permission for one type of window it is unfair to change the requirements after construction is well under way. Do not change the glass. For the sake of the residents who have made life plans to move into the building soon, let's get the building finished now!

Dear Chair Whalen and Members:

Our names are Marvin and Sandra Fong and we are testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is my future home and I can't wait for the building to be completed. Recent news reports have discussed the glass that is being used to build the project. I chose this building because it is centrally located and will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

We really like that Symphony Honolulu is designed to meet or exceed the U.S. Green Building Council's LEED energy savings standard, and look forward to living in the first brand new residential condo in Honolulu designed and built from the ground up as a "Green Building". We also look forward to the privacy that the current materials will provide.

We strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

Sincerely,

CommentThe Honorable John Whalen, Chair
and Board Members

Dear Chair Whalen and Board Members:

My name is Kris Hui and I am testifying in support of the Symphony Honolulu project in Kakaako. Symphony Honolulu is my future home.

During last week's public testimony, a concerned woman voiced a complaint about reflectivity at certain times of the day and year, and she showed a cellphone picture taken from her lanai up in the Punchbowl area showing sun reflection off of the glass.

As you all know, all glazed surfaces reflect light to some degree. Attached are photos taken yesterday morning and afternoon around Kakaako showing the sun's reflection off of buildings, which naturally occurs depending on the time of day, the season, and the location. However, the majority of the time these glass surfaces also reflect the sky, clouds and trees, enhancing and blending with the surrounding natural environment.

Reflectivity has no connection to the VLT waiver request now before the HCDA. There is no direct correlation between VLT and reflectivity, but there is a correlation between high VLT resulting in higher solar heat gain through the glass.

The high performance glass used on Symphony reduces the transmission of the sun's heat into the residences, helping to reduce energy consumption. Symphony Honolulu is designed to meet or exceed the U.S. Green Building Council's LEED (Leadership in Energy and Environmental Design) energy savings standard, a requirement within HCDA's green building rule.

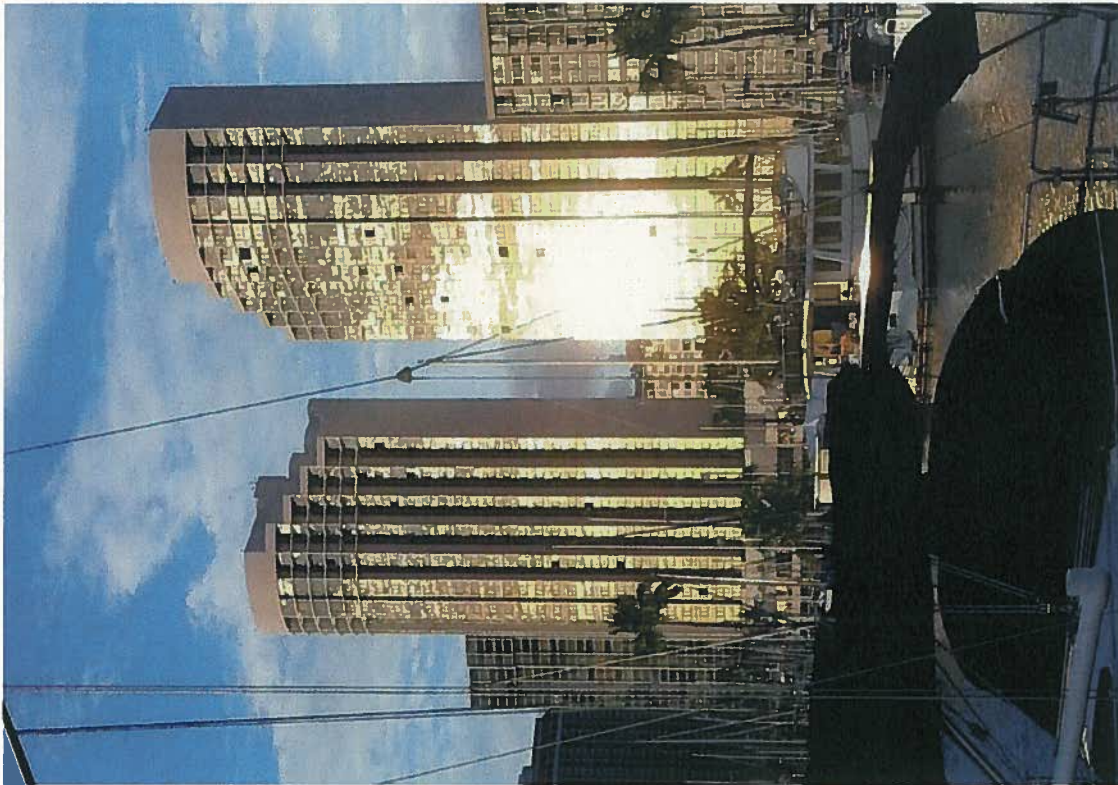

I humbly urge you to consider the request before you and vote to keep Symphony Honolulu's project built sustainably, with the materials that are already in place.

Mahalo for your consideration of this matter.

I strongly support the Symphony Honolulu's case that the window tinting should not hold up the completion of the building. This silly and unnecessary issue being raised is a perfect example of why homes cost so much in Hawaii. The wasted costs raise the cost of living for everyone. Get the building built and get homes available for occupancy. Other buildings in the area have much lower VLT...is HCDA planning to require those building to replace their windows?!

We have an extreme housing shortage on the island, let's not make it even more difficult to produce homes.

I support the construction of the symphony. It would be foolish to delay construction because of a lack of foresight by the HCDA. The symphony will provide housing for many, which we need on Oahu.

I'm hoping that the glass gets approved. Other buildings around Symphony (909, Imperial Plaza, Koolani, Hawaiki...) has a much darker tint. Not sure why its an issue. Allowing darker tints would make the building a lot more greener. Looking at Pacifica Honolulu and Moana Pacific glass, it's very transparent. However it looks very ugly, because everyone had different color tint, different types of window covering (vertical and Horizontal shades and Drapes). Please allow Developers to install current glass. it makes sense.

Thank you and do not hesitate to call.

Cc: Scott MacKinnon <MacKinnon@m4law.com<mailto:MacKinnon@m4law.com>>
Subject: Testimony for Symphony Honolulu Hearing

Dear HCDA Board,

I am submitting this photo of Hawaiiiki, which was taken from my camera at 6:51 am during my morning walk today.

This photo is being provided in response to the photo presented of Symphony at our last hearing, and as additional evidence to show that glass buildings reflect the Hawaii sun.

The sun's reflection depends on the time of day, and the sun's location in relationship to the building. We will also be submitting a separate photo log of other prominent glass buildings in Honolulu via separate email.

We understand and appreciate the HCDA's desire not to have "dark and Darth Vader" looking buildings. In our view, Symphony and many of the buildings in Kaka'ako are light and beautiful, and certainly far from being dark and ominous.

Thanks again for the opportunity to present our case, and we respectfully request your approval to waive the VLT rule for Symphony Honolulu.

We are very sorry that our glass selection has caused the Violation and Petition hearing.

With Aloha,

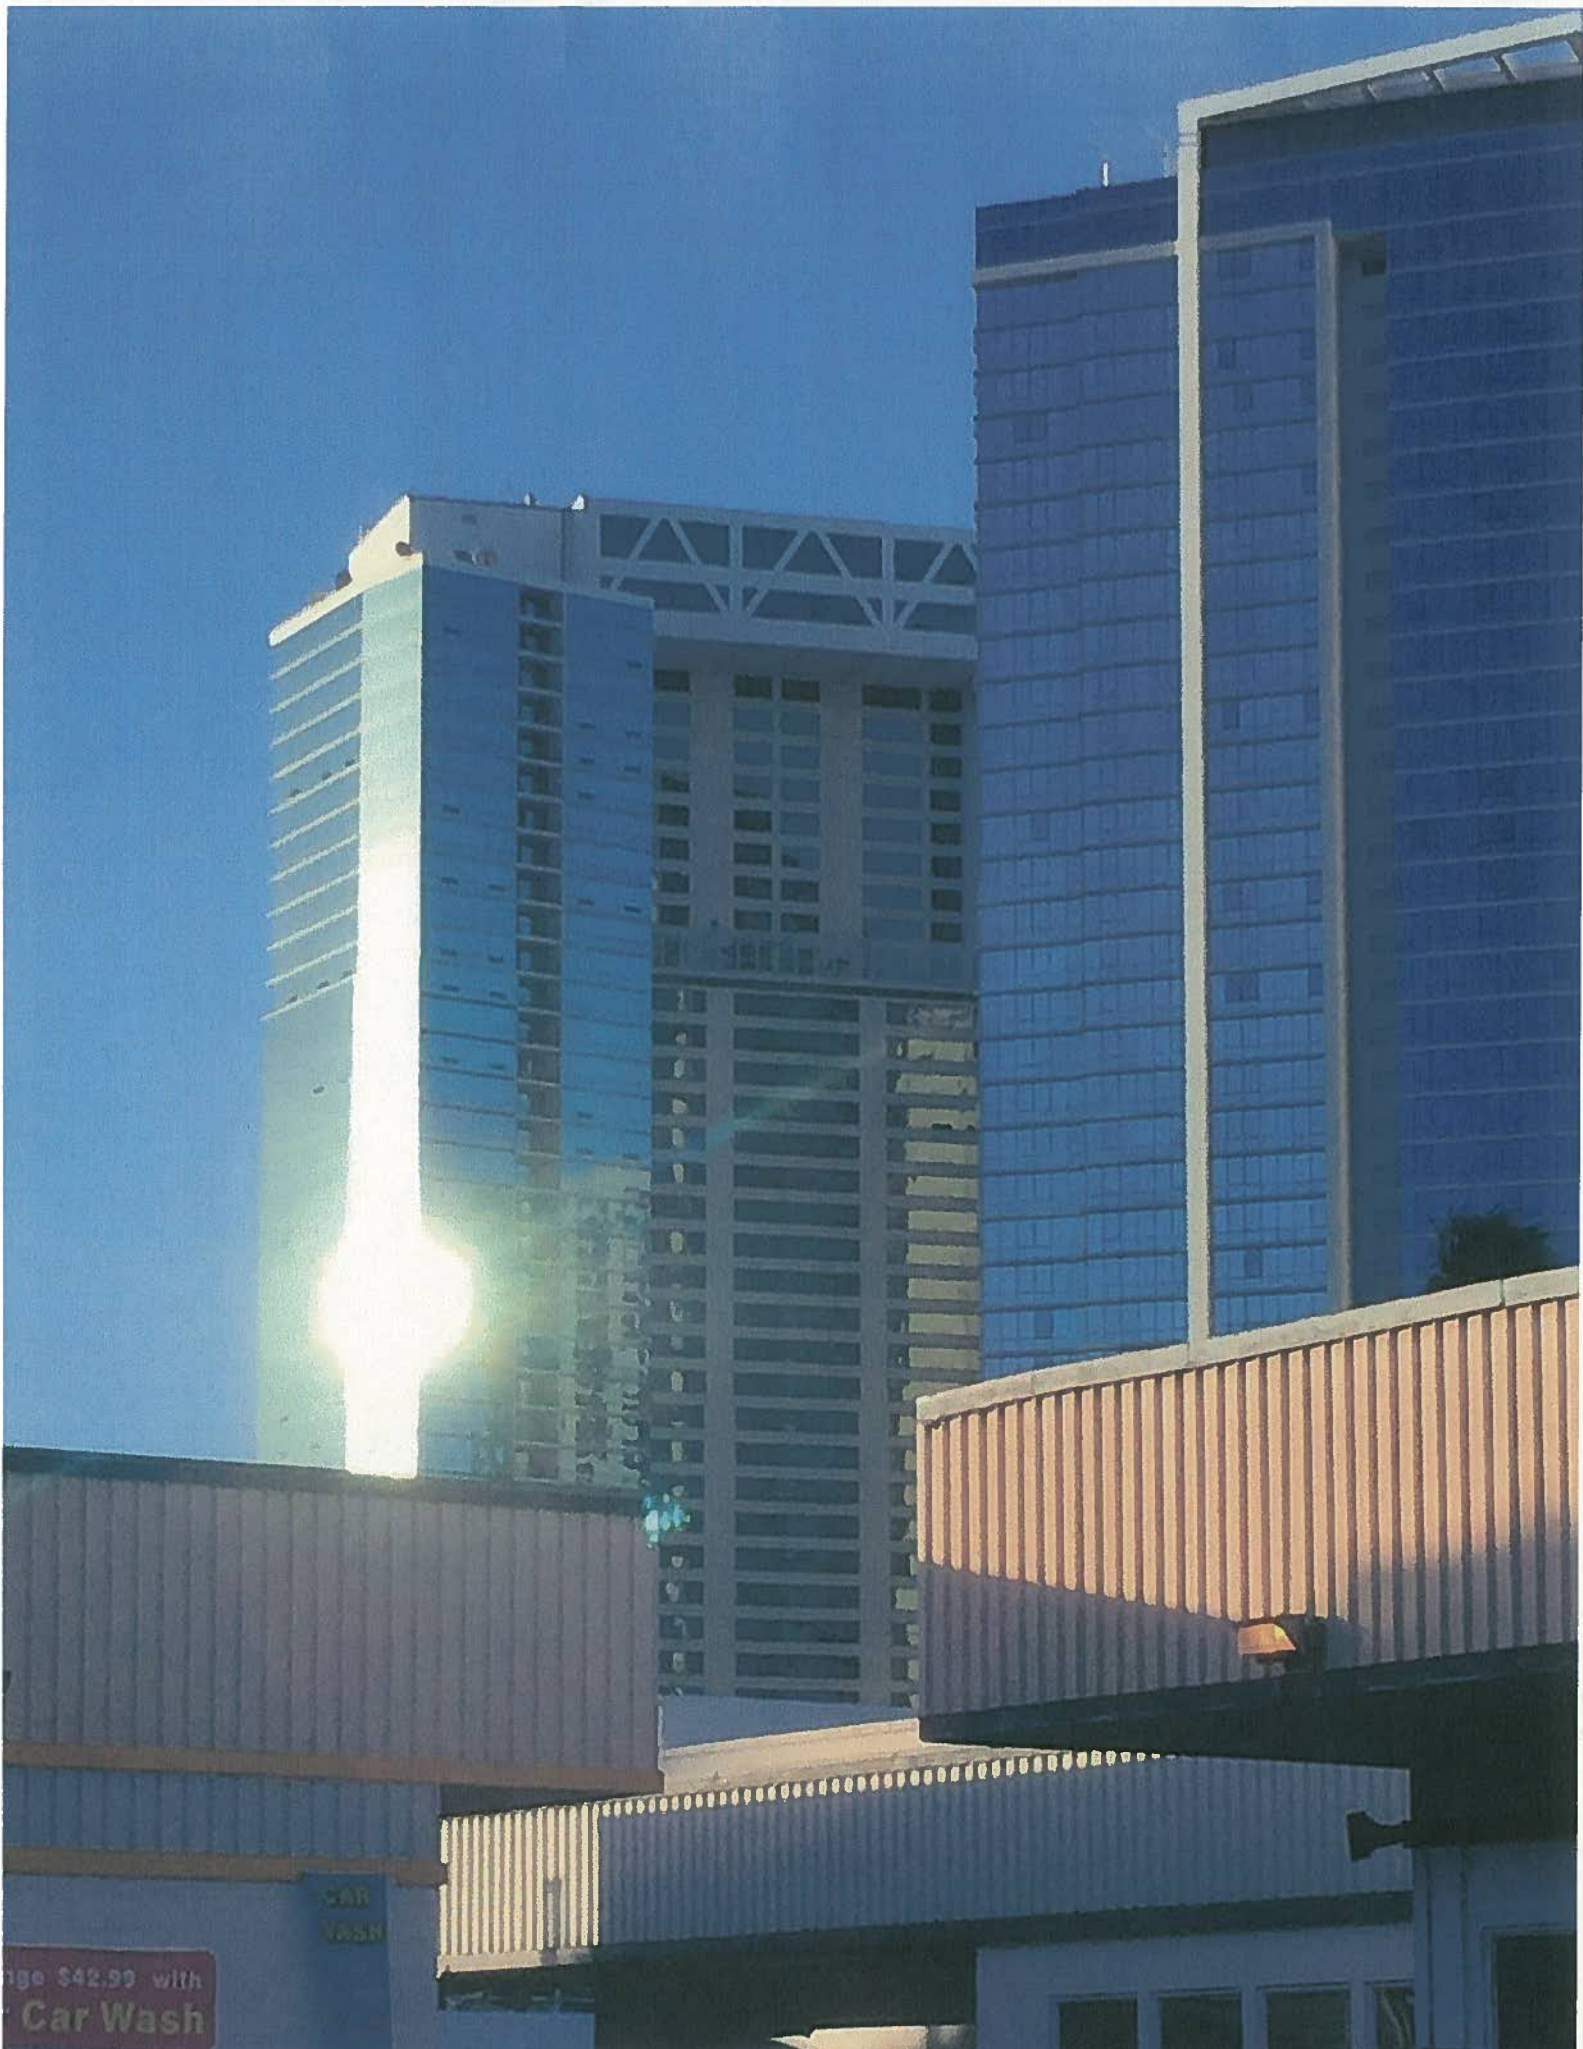

Dan Nishikawa
OliverMcMillan

The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

Thank you for this opportunity to provide a few comments about the issue before you.

Whenever new rules are implemented, there is always a period of time, in which the “kinks” of the rules have to be worked out. This is one of those times.

I believe that that the “glass rule” should to be amended to meet the intent and goal that the staff and the public intended for it to meet. The staff testified before you to the fact that the intent of the glass rule was to address the reflectivity or glare of the glass. The rule as written however, addresses the level of visible light transmission or VLT that is emitted into a building. The amount of glare vs the amount of light allowed into a building, two very different outcomes. Clearly, there is an issue that should be addressed.

Of equal or more importance is the need to be sustainable. OM Pacific Rim built Symphony Honolulu with glass that will provide comfort for its residents, while utilizing the latest technologies available to ensure that the building meets LEED design standards and meets the state’s energy conservation goals.

Unfortunately, the rule as written forces developers to make a choice, meet the VLT glass rule, which is only about how much light goes into a building or build to meet the state’s energy conservation goals. For a developer and as a conscientious member of the community, a building that is energy efficient, that meets energy conservation goals and that will provide a safe, cost efficient living environment for its residents is very important. When faced with the choice, meeting energy conservation and efficiency is the right decision to make.

With housing costs soaring, OM Pacific Rim and other developers want to build the best buildings that they can. Developers, who build in this state, do not build something while willfully or knowingly ignoring the rules of the area. This island is too small for that.

I believe that as a member of the growing Kakaako community, OM Pacific Rim strives to be a good corporate and active participating citizen that tries its best, to develop projects that will be meaningful today and into the future.

I also believe that OM Pacific Rim stands ready to work with HCDA and its staff in finding solutions that will make Kakaako the standard bearer for workforce housing and creative design elements that incorporates energy conservation methods and cost efficiency for all of its community members.

I urge you to amend the VLT rule and to work with OM Pacific Rim to address the inconsistencies of well - intentioned rules. Thank you for this opportunity to testify.

The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

My name is Wesley Sato and I am testifying in support of the Symphony Honolulu project in Kakaako.

Symphony Honolulu is my future home and I can't wait for the building to be completed. Recent news reports have discussed the glass that is being used to build the project. I chose this building because it is centrally located and will be designed with sustainable living in mind. We should all be aware of how we use energy and how we can incorporate Hawaii's environment into our living space. The more that we can utilize Hawaii's natural resources, such as the sun and the wind, to create a better environment, the better our communities will be for today and the future.

I really like that Symphony Honolulu is designed to meet or exceed the U.S. Green Building Council's LEED energy savings standard, and look forward to living in the first brand new residential condo in Honolulu designed and built from the ground up as a "Green Building". I also look forward to the privacy that the current materials will provide.

I strongly urge you to consider the request before you and vote to keep Symphony Honolulu's project as sustainable as possible, with the materials that are already in place.

Thank you for your consideration of this matter.

Sincerely,

Wesley Sato

The Honorable John Whalen, Chair
and Members
Hawaii Community Development Authority-Kakaako
547 Queen Street
Honolulu, HI 96813

Dear Chair Whalen and Members:

Thank you for this opportunity to provide a few comments about the issue before you.

Whenever new rules are implemented, there is always a period of time, in which the “kinks” of the rules have to be worked out. This is one of those times.

I believe that that the “glass rule” should to be amended to meet the intent and goal that the staff and the public intended for it to meet. The staff testified before you to the fact that the intent of the glass rule was to address the reflectivity or glare of the glass. The rule as written however, addresses the level of visible light transmission or VLT that is emitted into a building. The amount of glare vs the amount of light allowed into a building, two very different outcomes. Clearly, there is an issue that should be addressed.

Of equal or more importance is the need to be sustainable. OM Pacific Rim built Symphony Honolulu with glass that will provide comfort for its residents, while utilizing the latest technologies available to ensure that the building meets LEED design standards and meets the state’s energy conservation goals.

Unfortunately, the rule as written forces developers to make a choice, meet the VLT glass rule, which is only about how much light goes into a building or build to meet the state’s energy conservation goals. For a developer and as a conscientious member of the community, a building that is energy efficient, that meets energy conservation goals and that will provide a safe, cost efficient living environment for its residents is very important. When faced with the choice, meeting energy conservation and efficiency is the right decision to make.

With housing costs soaring, OM Pacific Rim and other developers want to build the best buildings that they can. Developers, who build in this state, do not build something while willfully or knowingly ignoring the rules of the area. This island is too small for that.

I believe that as a member of the growing Kakaako community, OM Pacific Rim strives to be a good corporate and active participating citizen that tries its best, to develop projects that will be meaningful today and into the future.

I also believe that OM Pacific Rim stands ready to work with HCDA and its staff in finding solutions that will make Kakaako the standard bearer for workforce housing and creative design elements that incorporates energy conservation methods and cost efficiency for all of its community members.

I urge you to amend the VLT rule and to work with OM Pacific Rim to address the inconsistencies of well -intentioned rules. Thank you for this opportunity to testify.
