STATE OF HAWAII HAWAII COMMUNITY DEVELOPMENT AUTHORITY

Kakaako Community Development District Honolulu, HI 96813

March 7, 2018

Chairperson and Members
Hawaii Community Development Authority
State of Hawaii
Honolulu, Hawaii

HCDA Board Members:

SUBJECT:

Shall the Authority Authorize the Interim Executive Director to Enter into a Development Agreement with SCD KM II LLC, a Wholly Owned Affiliate of Stanford Carr Development LLC, for Development of the Innovation Hale Project?

SUMMARY:

The Authority is being asked to authorize the Interim Executive Director, to enter into a development agreement for the development of the Innovation Hale ("Project").

AUTHORITIES:

Under Hawaii Revised Statutes (HRS) §206E-4(10) this undertaking in partnership with a developer is consistent with the Authority's powers to arrange for the development of such Project.

BACKGROUND:

The Project site is located on T.M.K. (1)-2-1-015:052 in the Kakaako Community Development District Makai Area, Honolulu, Oahu, on property owned by HCDA, also known as Lot C.

The Innovation Hale is part of the initial phase of the HCDA's Innovation Block at Lot C Masterplan. The master plan for Lot C is provided as Exhibit A.

In 2015, the HCDA issued a request for proposal (RFP) for planning, design, construction, and financing of a civic/mixed-use commercial project for the initial phase of the Lot C masterplan (specifically the Entrepreneur's Sandbox, and the Innovation Hale). Stanford Carr Development (SCD) was the sole respondent to the RFP and the Authority approved the recommendation of the

RFP evaluation committee to select SCD for the development and enter into a development agreement.

Summary of Authority Actions:

- On January 8, 2014, the Authority authorized the Executive Director to enter into a memorandum of agreement with the High Technology Development Corporation for the delegation of funds for the planning and design of HTDC's facility to be located on Kakaako Makai Lot C.
- On May 7, 2014 the Authority authorized the Executive Director to expend up to \$2,725,000.00 in Capital Improvement Projects funds pursuant to memorandum of agreement between the High Technology Development Corporation and the Hawaii Community Development Authority and engage consultants for planning and design of office facility for HTDC to be located on Kakaako Makai Lot C.
- On September 19, 2014, after applying for federal financial assistance, the HTDC and HCDA were issued a U.S. Department of Commerce EDA grant award for \$3.0 million for the construction of the Entrepreneur's Sandbox.
- On October 1, 2014, the Authority authorized the Executive Director to enter into a memorandum of understanding with the HTDC documenting HCDA's and HTDC's respective roles and responsibilities regarding the EDA grant application for the Entrepreneur's Sandbox.
- On November 4, 2015, the Authority authorized the Executive Director to prepare and release an RFP for a civic/mixed-use commercial development on Lot C including the Sandbox for HTDC.
- On January 6, 2016, the Authority accepted the determination of finding of no significant impact for the Final Environmental Assessment prepared for the Innovation Block at Lot C Master Plan.
- On July 13, 2016, the Authority adopted the recommendation of the RFP Evaluation committee for a civic/mixed-use commercial development on Lot C (the Entrepreneur's Sandbox and Innovation Hale) and authorized the Executive Director to negotiate a development agreement with Stanford Carr Development LLC (SCD).
- On September 6, 2017, the Authority authorized the Executive Director to execute the Economic Development Administration's Site Certificate and the Covenant of Purpose Use and Ownership, as Required Under the Economic Development Grant.

ANALYSIS:

SCD's development program for the Project provides for design, financing, and construction of a 7-story, 153,000 s.f. office building including commercial retail space on the ground floor. SCD's Project design takes into consideration its relationship to the adjacent Entrepreneur's Sandbox providing a physical connection to create a central hub for the Innovation Block. Proposed financing for the Project include developer equity, private construction loan, and office sales deposits. SCD is a 65-year ground lease from HCDA for the underlying land. SCD's proposal is provided as Exhibit B. The draft final development agreement is provided as Exhibit C.

SCD will have a Project feasibility period of 730 calendar days from the date of execution of the development agreement to complete due diligence. Due diligence includes archaeological, environmental and infrastructure studies, feasibility analysis, and obtaining a HCDA development permit.

RECOMMENDATION:

Staff recommends the Authority authorize the Interim Executive Director to enter into a development agreement with SCD KM II LLC, a wholly owned affiliate of Stanford Carr Development LLC, for development of the Innovation Hale project, substantially in the form provided in Exhibit C, pending any further review of legal matters by the Deputy Attorney General.

Respectfully submitted,

Deepak Neupane, P.E., AIA

Director of Planning & Development

APPROVED FOR SUBMITTAL:

February 8, 2016

Hawaii Community Development Authority State of Hawaii 547 Queen Street Honolulu, Hawaii 96813 Attention: Executive Director

Subject: Request for Proposal for Kakaako Makai Innovation Block at Lot C (RFP)

Ladies and Gentlemen:

Stanford Carr Development, LLC (SCD) is pleased to submit its RFP response for the development of Phase 1 of the Kakaako Makai Innovation Block Master Plan. We appreciate this incredible opportunity and would be proud to be a part of the State's effort to diversify Hawaii's economy, as a strong economy benefits everyone.

With over 25 years of development experience in Hawaii, SCD has the capability, experience and track record necessary to deliver a high quality project envisioned to serve as the center for innovation and the catalyst to stimulate business in the fields of the arts, education, medicine, manufacturing and technology. SCD has recently completed a 19-story apartment building and is currently under construction with a 400' condominium tower in Kakaako and is therefore familiar with developing in the area.

This RFP response covers the development of the Sandbox and Innovation Hale buildings, and is summarized as follows:

Sandbox

SCD proposes to develop this building on behalf of HCDA and HTDC under a fee based arrangement, pursuant to its current 13,500 square foot design by Ferraro Choi, with ownership, operation and financing of the facility by the State of Hawaii. Construction is anticipated to require 13 months to complete and is scheduled for completion in the second half of 2018.

Innovation Hale

SCD plans to develop this building as a privately-owned condominium office building, which is designed as a 7 story building consisting of approximately 153,000 square feet of space. SCD has carefully designed the Innovation Hale to complement the current design of the Sandbox, with connections to create a central hub for the two buildings, as well as for other buildings to be developed in future phases of the area's master plan. SCD intends to obtain all financing necessary to complete the project, using equity, construction financing and sales deposits. SCD intends to form a limited partnership with the two anchors, Fisher Hawaii and 'ike (formerly known as Data House) planned for the first two levels. Construction is anticipated to require 16 months to complete and is scheduled for completion at the end of 2018. SCD requests that a 65-year ground lease be granted by the State of Hawaii for use of the underlying land for this building.

After considerable research, we believe that the condominium office building concept is the most viable development plan for today's office market. A market study prepared by Colliers International confirming this strategy is included in this RFP. SCD has also obtained a letter of interest from a Hawaii lender who would be interested in providing construction financing for the project.

We believe this will be a win-win for all parties involved, and the State will benefit with a long term income stream from the ground lease and have the critical mass from private investment interest to move the Kakaako Innovation Block Master Plan forward, making the vision reality. We look forward to the opportunity to work together and to make this happen.

Mahalo for your consideration.

As one of the most dynamic real estate development firms in Hawaii today, Stanford Carr Development (SCD) has consistently pursued the ideal of creating quality developments for our island communities. Founded in 1990, SCD has developed and built over 4,000 homes and achieved in excess of \$1.5 billion in sales over its 25 year history. SCD is responsible for some of the most recognizable and award winning residential communities in Hawaii, including The Hawaii Kai Peninsula and The Colony at the Peninsula on Oahu, Kulalani at Mauna Lani, Waikoloa Colony Villas and Kahakai Estates on the Big Island, and the master planned community of Kehalani and Wailea Fairway Villas on Maui. Housing product types include single family homes, low rise condominiums and townhomes, mid-rise apartment buildings and high rise condominiums, appealing to a broad array of buyer profiles, from first-time to move-up and resort buyers.

With a passion for excellence in architectural design and quality, SCD continues to vigorously pursue its mission to develop high quality communities that achieve strong market acceptance and enhance values over the long term. As an acknowledged industry leader, SCD has become known for creating distinctive and successful communities through:

- Innovative site planning
- · Diversity in architectural design and product types
- Environmental sensitivity
- Cutting-edge technology and building materials

SCD continually strives to diversify its real estate development focus in mixed-use, TOD, commercial and retail projects, while seeking out new concepts in design, construction and financing to properly address the changing needs of Hawaii's communities. Most notable are the Keauhou Place and Makaha Resort projects recently under development.

Stanford Carr is president of SCD where he oversees an extensive portfolio of projects ranging from master-planned communities to resort-style living to affordable housing. As a locally and nationally recognized leader in business, Stanford is known for building communities on a foundation of family living, the spirit of the islands and respect for the land. With decades of accomplishments in architectural design and community development, Stanford's vision consistently captures the possibilities and opportunities in designing projects and developing land.

Born and raised on Maui, Stanford understands the responsibility he has as a leading developer to build thoughtful homes while working collaboratively with the communities and needs of those individuals living in them. In the 25 years since he founded SCD, Stanford's projects have earned numerous local and national awards from the U.S. Department of Housing and Urban Development, the American Institute of Architecture and the Governor of Hawaii, among others.

While he's known as one of Hawaii's most successful developers, Stanford has made giving back to the community a core value of his corporate philosophy. Currently he is a board member the University of Hawaii Foundation and chairs the Real Estate Committee. Stanford sits on the Board of Directors for the Rehabilitation Hospital of the Pacific Foundation where he is the Treasurer and Co-Chair of the \$17 million Capital Campaign. He is also a board member of Trust for Public Land, Japan America Society of Hawaii (JASH), Hawaii Council on Economic Education (HCEE), American Red Cross and Waialae Country Club. Previously, Stanford served on the Political Action Committee Trustee-Government Affairs Committee, as a director of the Hawaii Developer's Council and as a member of the Governor's Advisory Board for the Department of Hawaii Homeland.

Stanford and his wife Kathy have three children. An avid water sportsman and deep sea fisherman, Stanford spends his free time with his family out on the Pacific Ocean.

Richard Riegels
Executive Vice President

Responsible for overseeing most aspects of the development process at SCD, Mr. Riegels also acts as a senior project manager on selected projects. He

works closely with design and project management personnel to ensure that SCD maintains its founder's high standards for design innovation and quality while striving to meet the schedule and budget goals established for these projects. Some of Mr. Riegels' most notable projects managed while at SCD include the Colony and Peninsula in Hawaii Kai and Keauhou Place in Kakaako.

Mr. Riegels brings a unique set of abilities to SCD. During his 44 years in real estate, he has actively participated in all aspects of the building process – as a licensed architect, as a construction manager and as a real estate development manager. He has been involved in numerous projects in Hawaii and the western United States ranging from planned residential communities, urban and resort hotels, hospitals and health care facilities to convention centers, school and university facilities, office buildings and warehouse complexes. Mr. Riegels holds a Bachelor's Degree in Architecture from the University of California, Berkley.

Kevin Kasai

Vice President, Development

Mr. Kasai manages the project management activities of a selection of projects under development, responsible for guiding project managers with their assigned projects. He is also responsible for conducting due diligence, economic feasibility and project financing for new developments being pursued or acquired by SCD.

Mr. Kasai began his real estate development career in 1991 in Honolulu, where he worked in project management for mainland based and local developers, managing townhome, single family subdivision, high-end resort, high-rise condominium and build to suit projects. He later relocated to the West Coast and obtained experience in equity investment, asset management, property entitlement and income property investing. Mr. Kasai has a financial background, through early career experience in public accounting. He holds a Bachelors of Business Administration Degree in Accounting from the University of Hawaii and a Master of Business Administration Degree in Real Estate Finance from the University of Southern California.

Kendall Korenaga

Construction Manager

Mr. Korenaga recently joined SCD to oversee the day-to-day construction operations of projects currently under construction. He brings 38 years of construction operations management, with extensive experience in completing projects on schedule, within budget, and in a safe and organized manner.

At his most recent positions as General Superintendent and Vice President of Operations with one of Hawaii's largest general contractors, Mr. Korenaga was responsible for the daily coordination and operations of all Oahu building projects, implementing and improving project management systems, standard operating procedures, project logistics and scheduling methods for the company. He has completed numerous projects under his supervision, with a total bid value in excess of one billion dollars, covering a diversity of project types, including senior housing, apartment renovations, residential subdivisions, governmental and educational facilities, retail centers, high-rise condominium towers and office buildings. Mr. Korenaga holds a Bachelor of Science Degree in Engineering from the University of Hawaii.

Pacific Island Realty, LLC

Laurie Lee Principal Broker

Laurie Lee is the principal broker of Pacific Island Realty, an SCD affiliate, and the exclusive broker for SCD real estate projects. Lee joined the firm 15 years ago, and has been principal broker over the last 10 years. In this position, Lee oversees project sales teams for all SCD projects statewide, including on Oahu, Maui and Hawaii Island. Lee is also responsible for all market planning and implementation for the projects.

Lee's real estate background includes brokerage experience in both the resale and new home markets and covers the full range of product types from entry-level homes to luxury, high-end condominiums. Prior to her success at SCD, Lee's previous project experience included sales at The Courtyards at Punahou, Hawaiki Tower, Harbor Court, and Royal Sea Cliff.

Lee is currently serving a 4-year term on Hawaii's Real Estate Commission. A graduate of the University of Hawaii, Lee holds a Bachelor of Arts Degree in Japanese language, as well as a Masters of Business Administration in international business.

Mike Kujubu Managing Partner

Michael Kujubu is a licensed architect and the managing partner for Alakea Design Group, an affiliate of SCD and full service architectural firm founded in 2005. Mr. Kujubu and his firm's design team of

4 design professionals primarily focuses on architectural planning and design for SCD projects. Recent work included architectural designs for the Keauhou Place condominium tower and master plan, the St. Francis Residential Care Community in Ewa, resort townhomes on Hawaii Island, and home designs for several residential projects on Maui.

Mr. Kujubu has been a registered architect for 40 years, previously serving as lead architect for shopping centers, a medical office complex, restaurants and governmental projects including facilities at Leeward Community College and Waipahu High School. Mr. Kujubu holds a Bachelor of Fine Arts Degree from the University of Hawaii.

(I) b. Previous Relevant Development Experience. Provide previous relevant project experience by Respondent and project team with brief descriptions of previous projects, relevant photographs, dates, locations, concepts, land uses, sizes, construction costs, and role of the development entity, etc

Section (I) b. Development Experience

Keauhou Place Honolulu, HI

Team Member: SCD
Role: Developer
Building Area: 556,795 s.f.
Total Floor Area: 920,280 s.f.
Land Area: 2.17 acres
Project Completion: 2017
Project Value: \$295M

Keauhou Place is the high-rise condominium tower component of a 4.2-acre city block master plan located at South and Pohukaina Streets in Kakaako Mauka, known as Keauhou Lane. SCD is the developer of this component, which will include 388 condominiums in a 400' tower, and 35 townhomes wrapping a multilevel parking garage with 1,165 parking stalls.

SCD lead the design of the conceptual master plan, working closely with the landowner to create an integrated mixed use plan for the development of 423 condominium units, 209 rental apartment units, 31,880 s.f. of ground floor retail space and a light rail transit station. Extensive collaboration efforts were made by SCD to bring together three independent users to complete and implement the master plan. When fully built, the master plan will serve as a model TOD oriented development, providing the live, work, play environment envisioned for this vibrant and redeveloping area.

Section (I) b. Development Experience

Halekauwila Place Honolulu, HI

Team Member: SCD
Role: Developer
Building Area: 189,444 s.f.
Total Floor Area: 283,081 s.f.
Land Area: 1.249 acres
Project Completion: 2014

Project Value: \$71M

Halekauwila Place is a workforce rental housing project located in the heart of Kakaako and adjacent to historic Mother Waldron Park. The 204-unit facility consists of 1, 2 and 3 bedroom apartments, and features a community lounge, computer lab, laundry facility, and 3,358 s.f. ground floor retail space. The parking structure contains 284 parking stalls, with over 912 photovoltaic solar panels on the rooftop generating 600 to 800 kwh to provide electricity for commercial and common areas. The innovative design serves as a benchmark for new affordable urban communities being developed on Oahu today.

SCD was selected as developer for Halekauwila Place through an RFP process administered by the Hawaii Housing Finance and Development Corporation. The project qualified for and was financed with Low Income Housing Tax Credits, which requires rental rates to be affordable to households at 60% or below the average median income for the area. The land for the project was acquired via a 65-year ground lease with the State of Hawaii.

(I) c. Relevant Commercial Experience. Provide previous experience in commercial development projects by Respondent and development team of properties with uses similar to those described in this RFP

PLANS NOT TO SCALE

Experience

Section (I) c. Commercial

Kokea Center Redevelopment Honolulu, HI

Team Member:

SCD

Role:

Developer

Building Area: Land Area: 305,301 s.f. 3 acres

Project Completion:

TBD

SCD (affiliate) owns a leasehold interest in the existing commercial improvements on this site located at the corner of Dillingham Boulevard and Kokea Street, in the heart of Kapalama, near downtown Honolulu. Leasable area consists of 128,211 square feet, in a mix of retail, office and industrial uses.

SCD has master planned the site for redevelopment as a Transportation Oriented Development, comprising a mix of uses to include ground floor retail space, a light rail transit station, low-rise rental apartments and high-rise condominiums, affordably priced to meet the housing needs of Hawaii residents. When completed, Kokea Center will comprise of 34,600 s.f. of retail space, 106 rental apartments, and 208 condominiums in a 22 story high-rise tower.

Section (I) c. Commercial Experience

Waipahu Industrial Center Waipahu, HI

Team Member: SCD
Role: Owner
Building Area: 99,701 s.f.
Land Area: 3.9 acres
Acquisition Date: 2004

This an institutional quality commercial investment property acquired by an SCD affiliate in 2004. The property is a multi-tenant industrial complex located in the Waipahu Industrial Park, consisting of 4 industrial buildings with a common area loading dock, glass window front entry doors, large roll-up doors and a restroom in each bay. The buildings were constructed in 1993, consisting of concrete tilt-up construction with plaster finish on the exterior walls and a built-up roof covering. The complex includes 97 parking stalls. The property is owned in fee simple and currently 96% occupied.

SCD acquired this investment property as an REO sold by Bank of Hawaii. At the time of purchase, the property was underutilized, with an occupancy rate of 77%. SCD's role is investor/owner and remains responsible for asset management decisions, while Sofos Realty Corporation handles all daily property management responsibilities.

Section (I) c. Commercial Experience

Kehalani Village Center Wailuku, Maui, HI

Team Member:

SCD

Role:

Developer

Building Area:

207,000 s.f. 20 acres

Land Area:

Ongoing

Project Completion: Ongo

This commercial center is the commercial component of the 550-acre master-planned community of Kehalani developed by SCD, located on the slopes of Wailuku Mountains in Central Maui.

The site borders Honoapiilani and Kuikahi Drive, and is adjacent to the Mauna Lani master-planned

community.

SCD planned and developed infrastructure serving the project site, as well as on-site improvements, including finished pads, utilities, roadway pavement, sidewalks and landscaping. Individual parcels were created and sold in fee simple under a commercial condominium to owner users, to comprise 207,000 s.f. of retail space when fully developed. Major tenants include Foodland, Longs Drugs, McDonalds, Coffee Bean & Tea Leaf and Aloha Petroleum.

(I) d. Financial Capability. Provide satisfactory evidence that the Respondent has the financial capability to develop the project as described in the RFP. This can be in the form of audited financial statements of the company for the past two consecutive years.

Section (I) d. Financial Capability

Since its inception, SCD has financed 25 individual projects using a variety of equity and debt arrangements structured to meet specific financing requirements for each project. Financing sources for projects include SCD equity and credit lines, private equity, pension funds, low income housing tax credit equity, institutional construction financing, tax-exempt bonds, HUD permanent loan programs and state agency loans. Providers of project funds are based both in Hawaii as well as the mainland and overseas. As a privately held company, SCD's financial statements remain confidential and therefore are made available at SCD's discretion. The following is a list of recent projects financed.

Section (I) f. Development Team

Limited Partners and Key Tenants

Fisher Hawaii and 'ike

Fisher Hawaii and 'ike, two Hawaii firms responsible for the inspiration and financial commitment for development of the Sandbox project, will be the major tenants in the Innovation Hale office building and be limited partners in a single purpose entity established for the development. Fisher will occupy the ground level and "ike will occupy the second level.

Contractors and Consultants

Nordic Construction PCL

Nordic Construction was selected to join the development team in recognition of its demonstrated history of building notable, high quality, large scale projects in Hawaii. With its most recently completed project at Iolani School, known as the Sullivan Center for Innovation & Leadership, Nordic can share valuable insights gained from its experience as the builder. The center most embodies the characteristics believed to be sought after for Kakaako Innovation Center. SCD sees the value in having a general contractor involved in the design process to ensure that the highest quality is achieved in the most expeditious and cost effective manner.

Colliers International

SCD has engaged Colliers International to prepare a market study to investigate the market potential for office condominiums in the Honolulu Market area (see Section (II) f. A copy of the professional resumes are included in this section.

Fisher Hawaii

Fisher Hawaii is the largest, locally owned and managed office products and furnishings company in the state. With three central locations in Kakaako, downtown Honolulu, and Mapunapuna, Fisher is able to service its core customer base in Honolulu.

For nearly 40 years, Fisher Hawaii has had a presence in the evolving and changing Kakaako district and plans to continue to be a part of the vibrant and transforming community. With a strong customer base of entrepreneurs, artists, teachers and parents, Fisher provides tools for their success.

Innovation is about so much more than high tech – it involves education, the arts and creativity. And innovators rely on Fisher Hawaii for their needs, from office supplies to artistic tools. Its core customer base has always been the small to medium sized business, the startups, educators and artist – the people that would benefit from the innovation center.

Following its recent expansion and the opening of its flagship warehouse location in Mapunapuna, Fisher Hawaii has been increasing its offerings of educational supplies. With fewer educational resource outlets in the state, Fisher saw the opportunity to expand in this area to provide teachers with the supplies and resources that they need – from workbooks and notebooks to paints and pencils. The art and education resource center was created to be a one-stop shop for students, educators and parents to receive the latest in educational tools and teaching aids to provide better learning opportunities for Hawaii's youth.

Fisher Hawaii has also become a major resource for the local art community, as it has recently expanded the types and quantity of art supplies. With the burgeoning art movement in Kakaako, Fisher was able to better serve its artists by catering to individual needs of its customers to allow them more creative freedom.

As a part of its long-term vision, Fisher is also working to provide innovators with a place to collaborate and meet. Fisher's core customer-base are often in need of space to exchange ideas and come together. These common work areas will allow startups, entrepreneurs, teachers and artists, to be able to come together and collaborate in a central location.

Fisher Hawaii's success and longevity are about "serving people," and the company was named Oahu's 2013 Retail Business of the Year. The management staff shares more than 25 years as a team, providing the widest selection of home and office products at the lowest prices. Fisher Hawaii's commitment is to serve customers with 100 percent satisfaction.

Key Individual at Fisher

Alvin 'Al' Hirata is the vice president and general manager of Fisher Hawaii where he oversees the entire operation of Fisher and its three locations in Kakaako, downtown Honolulu and Mapunapuna.

Hirata has nearly 35 years of experience working for Fisher Hawaii and has taken the lead in its recent expansion. Prior to becoming Fisher's vice president and general manager, for the past five years, he oversaw the office furniture division.

He graduated from Farrington High School and went on to attend the University of Hawaii at Manoa where he received a bachelor of business administration degree from Shidler College of Business.

Alvin 'Al' Hirata

An active member of the community, Hirata is a member of the Honolulu Executives Association, Christ Centered Community Church, Hope Chapel Maikiki and a community outreach organization, Hoala.

About 'ike

'ike, formerly known as DataHouse Holdings Corp., manages a wide variety of businesses that specialize in technology, healthcare and consulting services. Its family of companies include DataHouse Consulting, TeamPraxis, 'Ekahi Health System, Sagely, Ambient, Hawaii Quality Physician Organization (HQPO) and Pacific Hi-Tech.

Dan Arita, a visionary who foresaw the need for made-in-Hawai'i technology solutions in the early days of the digital revolution, founded DataHouse Consulting in 1975. Forty years later, and after a recent rebranding of the parent company from DataHouse Holdings Corp. to 'ike, it remains the most innovative family of companies in the Hawaiian Islands. Headquartered in Honolulu, 'ike has over 300 employees and manages the following seven companies:

- · DataHouse Consulting is a technology consulting firm that works with organizations to improve business practices in a variety of key industries including healthcare, government, banking and education. DataHouse Consulting delivers a wide range of services including software application development, host and systems integration, managed services by Nettricity, web site development, management consulting, systems implementation, quality assurance and testing, project management and creative services;
- TeamPraxis is the premier provider of healthcare IT solutions that administers business and clinical solutions to independent healthcare providers including practice management, electronic health records, population health and practice transformation;
- 'Ekahi Health System is an innovative healthcare delivery organization that unifies independent physician practices, urgent care clinics and care management teams. 'Ekahi's mission is to improve the overall health of the community by working with existing health organizations to deliver and provide greater access to comprehensive quality care;
- · Sagely provides senior living communities with easy activity planning and participation tracking. Sagely works with some of Hawai'i's largest and most reputable senior living communities to develop and implement this technology that helps connect seniors, caregivers and families;
- · Ambient, a boutique management consultancy company, works with businesses to integrate, articulate and deliver its strategic initiatives. Services include leadership and coaching development, team building, adaptive communications, strategy development, strategy communication and adoption, business modeling and planning, business analysis, process design and improvement, change delivery management and project leadership;
- · Hawaii Quality Physician Organization (HQPO) assists members participating in HMSA's Patient Center Medical Home and Pay-for-Quality programs. HQPO empowers Hawai'i's independent physicians to provide the highest quality of care and maximizes revenue returns; and
- Pacific Hi-Tech is an IT solutions-focused company that offers businesses a variety of IT services including project management, application development, quality assurance and testing, instructional design and training, business and technical analysis, data and network administration and support, operations management and IT security.

TeamPraxis

Key Individual at 'ike

Creighton Arita serves as the chief executive officer of 'ike and focuses on the strategic direction of the company. Among Mr. Arita's responsibilities is the ability to anticipate change and emerging trends, realize the full potential of evolving industries and integrate that knowledge to create products and services that best meet the clients' needs. Prior to his role as chief executive officer, Mr. Arita was the founder and chief executive officer of TeamPraxis, Hawai'i's leader in healthcare IT solutions for independent physicians. He also served as an executive vice president at the investment management firm Cadinha & Co.

Creighton Arita

Mr. Arita holds a bachelor's degree in finance, real estate and economics, and a master's degree in business administration and strategic planning from the University of California, Berkeley. He is a graduate of Iolani School. Committed to giving back to the community, Mr. Arita serves on the board of the Hawai'i Health System Corporation (HHSC) and is the founder and executive pastor for Christ Centered Community Church.

ABOUT NORDIC PCL:

Nordic PCL is a general contractor with local roots and global connections. The company was **established in Hawaii in 1938** under Nordic Construction Company, and merged with PCL Construction in 2008 after completing several large joint ventures, including the \$200 million Hawaii Convention Center. Nordic PCL brings together the best of both worlds—local market knowledge and global capabilities coupled with financial strength.

SERVICES

Nordic PCL offers an extensive history of experience in preconstruction, construction management, general contracting, and design-build services. We pride ourselves on being builders, not brokers, with the capability to self-perform critical portions of the work.

RESOURCES

Nordic PCL offers unsurpassed purchasing power coupled with the ability to attract the most competitive pricing from subcontractors and suppliers.

SAFETY

Our incident frequency rate is well below the industry average, and we continue to strive for a corporate goal of ZERO INCIDENTS.

Iolani School, Sullivan Center for Innovation & Leadership (Phase 2)

Location:

Honolulu, Hawaii

Owner:

Iolani School

Completion Date:

08/2013

The Sullivan Center for Innovation & Leadership is the centerpiece of Iolani School's 150th Anniversary.

The four-story, 42,000-square-foot building is located in the middle of the upper school campus and features a library, robotics and media labs, senior lounge, and extensive "flex space."

Sustainable features include a reverse-slope curtain wall design that provides continuous shade, architectural light shelves, a modular green roof system, and low-emission finishes. The project received LEED® Gold certification, and is also anticipated to be the first school to receive the stringent HI-CHPS Verified rating.

From kindergarteners creating their own construction memory books, art students painting the safety fence, the fourth grade Boy Scout troop touring the site to earn their engineering badge, to a science teacher conducting mass experiments on the augercast concrete, the school community became actively involved with the project.

Punahou School, Grade 2-5 Neighborhood (Phase 1A)

Location:
Owner:
Completion Date:

Honolulu, Hawaii Punahou School Estimated 05/2016

The Grade 2-5 Neighborhood is the result of collaborative planning and brainstorming. Punahou School teachers and staff visited various educational institutions to understand the connection between learning and the environment, and discovered that openness and flexibility stimulate creativity and teamwork.

The project includes four two-story buildings with 16 studios (classrooms), a Hawaiian forest, and three Kompan® play structures. The studios have an open design with moveable partitions and breakout rooms, and will foster interaction between students and teachers.

The superstructure is being constructed with structural steel framing, and the scope includes various construction methods and materials, including concrete columns, slabon-grade concrete, elevated set-in-floor concrete, and concrete topping over pan decking.

The project is targeting LEED® Platinum certification, and includes sustainability features such as material recycled from the Winne Elementary Units, living walls, and a roof catchment system that will use rainwater for irrigation. Wall viewports will also allow students to view the mechanical duct work, piping, AC, and plumbing lines.

Alii Place

Location:

Honolulu, Hawaii BetaWest, Ltd.

02/1992

Owner: Completion Date:

Alii Place is a 24-story, 316,000-square-foot office tower in the historic downtown Honolulu Capitol District, across the street from the Iolani Palace. The high-rise is constructed of structural steel with a cast-in-place, reinforced concrete basement parking area. The superstructure is clad with distinctive architectural precast acid-etched, red-tinted concrete panels.

The project team deftly managed very tight site constraints and neighborhood scrutiny.

Symphony Honolulu

Location:

Honolulu, Hawaii

Owner:

OliverMcMillan Pacific Rim, LLC

Completion Date:

Estimated 01/2016

Symphony Honolulu is a 43-story luxury residential condominium on a 2.25-acre site across from the Neal S. Blaisdell Center. The building's base incorporates a seven-story poduim with an exotic car dealership on the ground floor and a 1,097-stall parking garage topped by the Grand Terrace recreation deck.

The tower will feature 388 one-, two-, and three-bedroom units and 14 penthouses. Amenities include an infinity pool, barbeque cabanas, fitness room, multi-media rooms, social room, spa, and two guest suites. The ground floor, and second and third levels of the podium will be home to JN Group Inc.'s Velocity, a luxury auto galleria.

Caissons and augercast piles were used for the foundation. The structure is cast-in-place concrete with post-tensioned slabs. The podium is clad with mechanical aluminum louvers and storefronts, including a two-story sliding glass wall system. The exterior will feature window wall units with glass lanais and exposed concrete finishes with linear patterned reveals.

Sustainable green building features such as PV panels are desired, but LEED® certification is not being targeted.

Waiea

Location:

Honolulu, Hawaii

Owner:

The Howard Hughes Corporation

Completion Date:

Estimated 10/2016

Waiea is a 39-story ultra-luxury residential condominium high-rise in the Ward Village development area. The project includes commerical lease space on the ground floor, a six-story parking garage, a recreational deck with water features and pool on the seventh floor, and six separate four-story townhomes. The 170 units will be fitout with high-end finishes. Sitework includes extensive courtyard landscaping, hardscaping, and water features.

The structure consists of augercast piles and cast-in-place concrete with post-tensioned decks. The exterior is a combination of architectural concrete, window wall, and curtain wall.

LEED® Gold certification is targeted.

Kamehameha Schools Kapalama Campus, Kaiwakiloumoku Hawaiian Cultural Center

Location: Owner:

Honolulu, Hawaii Kamehameha Schools

Completion Date:

09/2012

The Kaiwakiloumoku Hawaiian Cultural Center was first envisioned by former Kamehameha trustee, Myron "Pinky" Tompson in 1992 as a place where Hawaiians could come together to learn, celebrate, and perpetuate their rich ancestral culture. The 20,000-square-foot, two-story facility was constructed on a 1.63-acre site.

During the hillside excavation, an unexpected 30-foot-high area of instability was discovered, and required the construction of a new retaining wall. Nordic PCL provided an innovative suggestion, and utilized Insulated Concrete Forms (ICF) to reduce the cost associated with this additional work. Since ICF can remain in place after use, the project team could build the wall from one side alone, eliminating additional excavation and backfill work used for traditional cast-in-place forms. After the concrete was poured, the front face of the ICF blocks was removed, and shotcrete was applied over the wall for a natural rock look.

SHARING YOUR VISION. BUILDING SUCCESS.

Hawaii Convention Center

Location: Honolulu, Hawaii

Owner: Convention Center Authority

Completion Date: 10/1997

Located at the gateway to Waikiki, the 1.1-million-square-foot Hawaii Convention Center embodies a modern "Hawaiian Sense of Place" on a 10-acre site, with its double pitched Hawaiian roof, soaring canopies recalling Polynesian canoe sails, and steel beams resembling palm trees. It has been the recipient of numerous awards for its innovative design, including being voted the most beautiful convention center in the world by The International Association of Exhibition and Events (IAEE).

This design-build project was the largest single construction contract undertaken by the State of Hawaii. The winning contractor/architect team was selected through an international competition in which the public was able to vote. As such, Nordic PCL had to guarantee costs based solely on the competition drawings, which were developed in just over two months. Despite a tight schedule of only 750 working days, the facility was turned over on budget and a month ahead of schedule.

AREA OF EXPERTISE

Michael brings to Colliers International over 25 years of marketing and marketing research experience. Michael has directed research efforts at commercial brokerages with a focus on providing information to assist in strategic decision making for real estate investors and brokerage clientele. This effort reported on nearly 600 million square feet of commercial/industrial properties in the San Francisco Bay Area.

Having been quoted in the Wall Street
Journal, USA Today, Real Estate Forum and
Commercial Property News as well as other
regional publications, Michael has been
recognized for his detailed analysis of the
commercial real estate marketplace and has
become the recognized source for
commercial real estate trend analysis and
forecasts for Hawaii's marketplace.

In addition to managing the primary and secondary research efforts in the collection of commercial office, retail and industrial market information and statistics, Michael established the company's real estate consulting division. Utilizing market factors such as: vacancy rates, absorption, net effective rents, and sales comparables, this consulting unit is able to advise developers, investors, property owners, and tenants on current and projected market trends.

PROFESSIONAL EXPERIENCE

Whitney Cressman Limited — Commercial Real Estate Marketing Research Director Directed brokerage, internal research efforts, and generated real estate consulting assignments at a busy boutique firm in San Francisco Bay area. Served as the principal liaison to press and media. Analyzed office, retail, and development site criteria for market demand and feasibility.

Cushman & Wakefield — Commercial Real Estate Research Services Manager Oversaw the compilation of market analytics for 600 million square foot commercial and industrial markets throughout the San Francisco Bay area. Recognized nationally and regionally for innovative data management and analysis. Selected to serve on a national career development board for research services. Directed research staff of 12 in five Bay area markets. Identified by brokers as a manager achieving service excellence.

(II) a. Development Narrative. Provide a narrative description of the design concept, rationale, and development program. Include a summary of the uses and floor areas.

Section (II) a. Development Narrative

Innovation Hale

Design Concept and Rationale

The master plan for Kakaako Makai Innovation Block at Lot C consists of 4 commercial buildings, and a 7 level parking structure to be developed in phases. This Proposal covers the development and construction of buildings included in the first phase, consisting of the Innovation Hale and Entrepreneur's Sandbox (Sandbox) buildings. SCD has commissioned Alakea Design Group to design the Innovation Hale. It is assumed that existing at-grade parking will be made available to serve the tenants and visitors for both buildings at reasonable rates during the interim until the permanent parking structure is developed in the second phase, and any parking variance will be supported by HCDA.

The Innovation Hale is planned to serve as the private office tower component for HCDA's development master plan for the Kakaako Makai Innovation Block. The Innovation Hale will be designed as a separate structure from the Sandbox building, though will be connected for pedestrian access. The design concept for the Innovation Hale as proposed by SCD intends to support the goals of the Innovation Block, which is to create a place of inspiration, entrepreneurial energy, and discovery through incorporation of architectural concepts and space planning to cause collisions, connections and random contacts in the everyday activities of tenants and visitors. Individual users may be involved in fields such as technology, medicine, science, the arts, education, design, law or finance, all of whom may serve as a resource or colleague for the other, to collaborate, organize and "Make it Happen." To achieve these ideals, significant space is being incorporated into to the design and positioning of buildings where these types of interactions can be encouraged or will naturally occur.

SCD's seven story design for the Innovation Hale blends a combination of glass, concrete and steel into a curvilinear shaped 7 story main structure, with the lower level serving as a critical connection between the Sandbox and the Kewalo Incubation Center (to be developed in a future phase). The curvilinear shape of the tower is inspired by the building form depicted in the Kakaako Makai Innovation Block Master Plan. This contemporary form is designed to create views of the ocean from the interior while blending in with the external environment and projecting a modern and futuristic centerpiece for the Innovation Block as a whole. The building gently tapers back in acknowledgement of the future public plaza that will front the building. A covered arcade will help form a link between the Sandbox and the buildings contemplated in the future phases. The south facing wall will be shielded by an aluminum sunscreen that will provide shading and reflect light into the interior ceilings cutting the lighting energy load. The diamond pattern of the screens is inspired by a Hawaiian tapa motif. The elevator core and the ancillary functions for the tower are located on the side of the building that faces the future parking garage. The covered entry will link the two structures when Phase 2 is completed. The

retail warehouse and building back of house rooms are located in the loading area as depicted in the master plan.

The Innovation Hale will comprise approximately 153,300 square feet of floor area, with 6 levels of office space totaling 110,994 square feet, and 1 level of retail space at the ground level totaling 30,837 square feet. In addition, the ground floor will include approximately 7,670 square feet of enclosed collaboration space with sitting areas and space for a coffee café serving beverages, snacks and grab-and-go light meals. It will have a direct connection to a smaller collaboration area in the Sandbox. The 2 story height of the retail space allows for a mezzanine level that serves as a connecting link to a roof garden above the collaboration space. The garden serves as another gathering area to meet and exchange ideas in an outdoor setting and could also be used for special functions. It is hoped that a direct connection to the garden from the future Kewalo Incubation Center could be incorporated into the design of the Incubation Center. Covered lanai space is included on the ground floor along Ilalo Street for outdoor café seating offering another area for social interaction and providing a welcoming frontage along the street.

As the hub of the Innovation Block or the "Nest", the collaboration space and second level rooftop garden will be the central location to get a quick meal or coffee, where people will come to meetup, and by doing so, will run into friends and colleagues in passing, catching up on the latest happenings or exchanging new ideas. A hip, upbeat, atmosphere will be encouraged in the interior design of the ground level space. This space will be designed for flexibility, and will accommodate desk or table space, and open space for group or industry events. These common spaces are envisioned to be used by the entire Innovation Block occupants with usage for formal displays and general patronage, as well as visitors from the adjacent JABSOM and the Cancer Research Center facilities. Every opportunity to increase public exposure to the Innovation Block by taking advantage of the collaboration and rooftop garden spaces and over time, make this location the go-to place where knowledge industry professionals will enjoy coming to, and eventually make it their hang out. Events will be scheduled on a regular, ongoing basis, such as hackathons, trade seminars, periodic technology events, after work beer gardens, fundraisers, and other professional and social events.

Construction Method and Sustainable Development Strategies

The Innovation Hale building is designed under Type IIA construction, incorporating steel columns and beams for its structural support with a concrete topping over metal decks, supported by a concrete slab foundation with footings on piles, subject to soils conditions. The roof will be built up, most likely using a thermoplastic polyoefin membrane as a roofing material.

The overall design for the Innovation Hale will be guided by principles of the new USGBC LEED rating system. As such, we are committed to incorporating green site and building design, and will incorporate such best practices as supportable by our business plan. Examples of such measures being considered for implementation are as follows:

Sustainable Site & Building Strategies:

- a. Support and encourage alternative transportation
- b. Consider bus stops along Ilalo Street
- c. Bicycle parking racks near plaza areas and main entrance(s)
- d. Use of rail transportation with the nearest station within 0.5 miles
- 2. Provision of Recreational Features
 - a. Open mini-plaza areas adjacent to buildings
 - b. Collaboration space with dining facilities and furnishings
 - c. Rooftop courtyard
- 3. Recycling Opportunities
 - a. Providing recycle bins throughout the site
 - b. Use of recycled material in construction to be encouraged
- 4. Water conservation opportunities
 - a. Use of drought tolerant plant species, and organic and/or inorganic cover mulch
 - b. Use of drip irrigation or other low volume, high efficiency application methods for ground covers and shrubs
 - c. High efficiency spray or rotator heads for lawn or large planting areas where drip systems are not feasible
 - d. Automatic rain shut-off sensors
 - e. Low-flow water efficient plumbing fixtures
 - f. High-efficiency flush rated toilets
- 5. Energy Conservation
 - a. Energy efficient lights, such as LED and fluorescent lighting
 - b. Energy star rated appliances
 - c. Tinted insulated glass with low SHGC
 - d. Aluminum solar screen fins incorporated into window wall system to reduce solar and heat gain, while also acting as a light shelf to reflect indirect light into the building's interior
 - e. Exterior grade insulated metal panels to reduce heat transfer through thermal mass
 - f. Wall and roof insulation
 - g. Mechanized electronic controls to monitor occupant load and manage energy efficient usages
- 6. Indoor Environment Quality
 - a. Consider low emitting in selecting adhesives and sealants, paints and coatings, and floor surfaces

Development Program

The Innovation Hale is intended to be developed under a commercial condominium form of ownership. As such, the floor area will be divided into condominium units, which will then be sold to purchasers who will occupy their space for their own business operations or lease their space out at their discretion, all in accordance with a recorded declaration, bylaws and rules and policies established by SCD at the inception of the condominium. Purchasers will be granted ownership of the condominium units, subject to a 65-year ground lease between the Owners' Association and the State of Hawaii established by SCD. Purchasers will be able to

finance their condominium units with long term mortgages and amortize loan repayment over as much as 25 years. SCD believes that condominium ownership of commercial space offers users greater flexibility in meeting their long term space planning needs as well as ensure the opportunity for eventual transfer of their businesses upon retirement. It also provides purchasers long term stability and security in keeping their operations uninterrupted by lease expirations or renegotiations encountered in traditional office building lease arrangements. SCD intends to presell condominium units in advance of commencing construction, as this will be necessary for meeting construction lender requirements for funding.

Sandbox Building

Design Concept and Rationale

HCDA has commissioned Ferraro Choi Architects to design the Sandbox facility, including preparation of construction drawings. SCD intends to utilize these plans to construct the Sandbox, or any revised plans mutually agreed upon by HCDA and SCD at a later date. SCD will participate in HCDA's efforts to manage its building design to meet its operational, programmatic and budget goals.

Development Program

SCD proposes to develop the Sandbox building on behalf of HCDA, serving as its fee based developer. In this capacity, SCD will be responsible for developing the building and turning the building over to HCDA at completion based on an agreed upon budget and final construction plans prepared and permitted by HCDA's current design team. SCD assumes that HCDA's design team will be tasked to obtain all regulatory approvals including Department of Planning and Permitting approval of construction plans prior to the anticipated construction start date of September 2017. Construction of the Sandbox building will require 13 months to complete, and is intended to be scheduled to be constructed concurrently with the Innovation Hale such that both buildings can begin occupancy within similar time periods to minimize construction activity inconveniences.

(II) d. Business Plan, Financing and Benefit to the State. Provide the following to support feasibility and key assumptions of the Proposal, including but not limited to items below.

Market and feasibility analysis, including market support, and assumptions, proposed marketing and leasing plan, tenant concepts.

Section (II) d. Business Plan Narrative

Innovation Hale Building

Marketing

Colliers International was commissioned to conduct a study of the Honolulu office market to assess the current and future demand for office condominiums and has concluded that demand exists for the proposed development. The report indicated that there is strong demand in office condominium buildings in Honolulu, with vacancy rates averaging 5.6% compared to traditional office buildings with vacancy rates averaging 12.7%. Sales rates of office condominiums have historically been brisk. Colliers estimated the sales price per square foot for the Innovation Hale space to range from \$490 to \$625 per square foot, with the high end of the range serving the medical services providers. SCD intends to upgrade the building's infrastructure to allow for a higher than normal mix of medical services providers. At present, there are medical service providers who are looking for new space due to possible residential conversions being planned by building owners (ie., Ala Moana Center). Based on this research, SCD believes that the Innovation Hale will be well received in the marketplace.

Marketing will consist of a period of presales activity of approximately 3 to 5 months, to achieve presales of approximately 70%. During this time, SCD will obtain binding contracts with nonrefundable deposits which will serve to support the sales prices projected in the Business Plan. The marketing effort will rely heavily on SCD's networks within the business community, as well as the commercial brokerage community. A commercial brokerage firm will be brought on the team serving in an advisory or co-broker capacity. It is projected that the units will be fully sold by construction completion. Sales contracts will require a non-refundable deposit that will be used to fund construction and related costs.

The ground level is slated for Fisher Hawaii, focusing on office equipment and furnishings, school and educational supplies and general office supplies retailing. The second level will be for 'ike, whose primary business is information technology development and application for the banking, education, government and healthcare industries. Having these two well-known powerhouses already committed to the project will create the synergy needed to drive increased interest from other compatible businesses. Other potential businesses to be targeted will include those in the fields of health care, technology, education resources, financial services and research.

The current space allocated per condominium unit is not yet established. As development plans become finalized and information on space preferences and requirements become known, a condominium map will be prepared specifying the floor area and dividing lines will be prepared for sales purposes.

Project Feasibility

A financial feasibility is included with this Proposal which assumes the development of the Innovation Hale as a condominium office building. Upon closings of condominium unit sales, each owner will become a member of the Owner's Association. There will be a management company in place to manage the fiscal and operational activities of the building facilities. It is anticipated that the Owner's Association will employ full time staff to manage, operate and maintain the facilities. A formal operational study will be established once facility and operating plans become better defined. For purposes of this feasibility analysis, industry averages will be used to approximate the cost of maintaining the common areas.

The budget assumed for construction of the Innovation Hale building is based on an estimate prepared by Nordic Construction PCL pursuant to the conceptual plans prepared by Alakea Design Group. This estimate excludes costs for unforeseen site conditions, including existing underground conditions, and hazardous materials handling/disposal that may be required upon formal review and environmental testing. Treatment of the existing electrical utility lines crossing the property has not yet been factored in the project feasibility.

With assumptions made about the marketplace, ie. sales prices, marketable ground lease terms, tenant allowances, etc, the project can be successfully developed with financing from private sources. To ensure that the project is completed and occupied as envisioned, a sufficient level of binding sales contracts will be obtained prior to construction commencement and as required by the construction lender. Conventional sources of capital necessary to fund the development include proceeds from a construction lender, equity investor and purchaser deposits. Given that the project is located in a severely distressed census tract, SCD intends to also pursue the possibility of generating equity funds under the New Markets Tax Credit program. Although not incorporated in the project's feasibility analysis presented, this potential equity source could greatly improve the project's viability, and reduce other financing required from the proposed capital sources.

Regarding permanent financing for office condominium purchasers, excellent financing is available through a combination of financing from the Hawaii Economic Development Corporation (HEDCO) and major Hawaii financial institutions including Bank of Hawaii, First Hawaiian Bank, American Savings Bank and Central Pacific Bank. Seventy percent financing is readily available through local banks, though when combined with HEDCO financing, 90% financing can be obtained, with blended interest rates below 4%.

Sandbox Building

Project Feasibility

As discussed previously, SCD proposes to develop the Sandbox building under a fixed fee arrangement. This Proposal assumes that the building will be owned and operated by HCDA to provide office space to other State agencies. Therefore, it is assumed that all financing required to complete the project will be obtained from grant and funding sources provided and/or administered by HCDA. Construction costs have been estimated by Nordic Construction PCL based on the 100% Schematic Drawings prepared by Ferraro Choi Architects dated September 14, 2015. Nordic's cost estimate specifically excludes the cost of handling hazardous materials conditions that may exist on site. A detailed listing of exclusions is included in its construction estimate. A preliminary development budget to construct the Sandbox Building pursuant to HCDA construction plans is included for reference.

EXHIBIT 'A' BASIS OF BUDGET

GENERAL:

- G-1 Owner shall provide evidence of financial arrangements prior to the commencement of the Work, in accordance with Article 2.2.1 of the AIA A201 General Conditions.
- G-2 Owner shall defend, indemnify and hold harmless the PCL, Subcontractor, its employees and agents from and against damages, injuries, losses and expenses caused by the acts or omissions of the Owner and/or the Architect, including, but not limited to the Owner being the generator of hazardous materials.
- G-3 Bid is based on the Owner remaining the named generator of regulated (i.e. hazardous) waste associated with materials to be removed, transported and disposed of by PCL.
- G-4 Based on attached document list.
- G-5 Cutting and patching to match existing finishes will match as closely as reasonably possible, but some differences may exist.
- G-6 Based on information presently available and furnished to NPCL by the Owner, Architect and/or others and various assumptions which have been made as to facts not yet known, this construction cost estimate has been prepared and furnished for the sole purpose of providing approximation of anticipated construction costs. This construction estimate should not, at this time, be relied upon as a commitment that the contemplated project can or will be constructed for the estimated cost.

DIVISION 2:

- Auger cast piles are assumed for support of the building.
- 2.2 Plain concrete paving is assumed for hardscape.
- 2.3 Chemical treatment for termites is included.
- 2.4 Restriping of the existing asphalt parking lot is included.

DIVISION 3:

- 3.1 Elevator and stairwell #1 walls are assumed to be concrete. Exterior walls of Stair #2 are assumed to be concrete and the interior walls are assumed to be drywall
- 3.2 The slab on grade is assumed to be 4" thick.
- 3.3 The elevator at the Collaboration Area is assumed to not have a pit.
- 3.4 Topping on metal deck is assumed to be normal weight.
- 3.5 It is assumed that the roof deck does not require a concrete topping.

DIVISION 5:

5.1 Stairs are assumed to be metal with steel treads, no concrete filled metal pans.

DIVISION 7:

- 7.1 Roof is assumed to be TPO with insulation.
- 7.2 Walk way pads are included as an allowance of \$30,000.
- 7.3 The patterned roof at Level 3 is based on using two colors of TPO material.
- 7.4 The Collaboration Courtyard is assumed to use pedestal pavers with waterproofing below.
- 7.5 A standing seam metal roof is assumed at the Covered Collaboration Area.
- 7.6 A metal grille has been included at the curved curtain wall area as an allowance of \$1.046.340.
- 7.7 Metal cladding of the exterior ground floor columns is included as an allowance of \$226,800.
- 7.8 Spray applied fireproofing is included.

DIVISION 8:

- 8.1 A total of 6 overhead doors have been included.
- 8.2 12 smoke curtains have been included as an allowance of \$120,000. It is assumed that smoke curtains are not required at the Collaboration Area elevator.
- 8.3 In place testing of the curtain wall system has been included as an allowance of \$150,000.

DIVISION 9:

- 9.1 A panelized wood ceiling system has been included at the soffit of the covered walkway.
- 9.2 Portions of the exterior wall that are not glass or concrete are assumed to be EIFS.
- 9.3 Drywall ceilings have been assumed at the restrooms and the lobby areas adjacent to them, and at the ground floor lobby.
- 9.4 Ceramic tile is included at the restroom floors and at the ground floor lobby floor.
- 9.5 Stone or tile has been included at the covered walkway as an allowance of \$188,050.
- 9.6 Solid surface counter tops have been included at the tower restrooms.
- 9.7 VCT flooring is included at the restroom hallways.

DIVISION 10:

- 10.1 Lockers have been included as an allowance of \$15,334.
- 10.2 Whiteboards for back of house areas has been included as an allowance of \$7,667.
- 10.3 Miscellaneous louvers have been included as an allowance of \$11,501.
- 10.4 Site signage is included as an allowance of \$9,317.
- 10.5 Building signage is included as an allowance of \$18,450.
- 10.6 Window washing anchorage system is included as an allowance of \$38,335.

DIVISION 14:

14.1 The elevator at the Collaboration Area is assumed to be hydraulic.

DIVISION 15:

- 15.1 Fire sprinklers are provided at all enclosed areas.
- 15.2 Plumbing work is limited to roof drains and work at the restrooms.
- 15.3 HVAC work is limited to providing equipment, vertical ductwork with stub outs at each floor, and ventilation to each restroom.

EXCLUSIO	ONS: The following items are specifically excluded:
EX-1	Design responsibility and insurance related requirements that are not clearly identified in the contract documents.
EX-2	Owner shall purchase Builders Risk Insurance in the form of all risk coverage, including, but not limited to earthquake, flood, and coastal windstorm with limits equal to the Contract Price.
EX-3	Impacts to the Contract Price and Contract Time for unforeseen conditions, including but not limited to hazardous materials.
EX-4	Air travel and associated expenses to various production plants, if required by owner.
EX-5	A/E design fees.
EX-6	Testing and special inspections costs and fees.
EX-7	Legal and Title costs and real estate taxes and fees.
EX-8	Easements and associated fees.
EX-9	Environmental impact assessment costs or fees.
EX-10	Green building classification and standards for LEED Certification.
EX-11	Grout clean finish or cement wash finish of exposed interior concrete.
EX-12	NPDES permit and costs.
EX-13	Incoming utility fees and assessments.
EX-14	Development permits.
EX-15	Water facilities charges
EX-16	Air rights and easements.
EX-17	Re-alignment of city sewer easements (other than shown on the drawings).
EX-18	Site survey and monitoring of adjacent properties (for vibration damage).
EX-19	Archaeological site survey, monitoring, protection, relocation cost and time impacts.
EX-20	City and/or development of offsite traffic impacts.
EX-21	Preconstruction fees.
EX-22	Aerial Photos
EX-23	Sewer access charges.
EX-24	Building Permit fees.
EX-25	Repaying of the existing asphalt parking lot.
EX-26	Skylights shown in the 3D model at the Outdoor Collaboration Area.
EX-27	PV panels.
EX-28	Termimesh for termite control.

Mr. Stanford Carr Stanford Carr Development, LLC 1100 Alakea Street, 27th Floor Honolulu, Hawaii 96813

Dear Stanford:

We appreciate you taking the time to meet with us to discuss your business case to develop a "for sale" condo project targeting medical professionals in Kaka'ako.

Through our own independent assessment, we agree that there's a limited number of existing office buildings in the urban core that are equipped and/or has capacity to support medical office practices such as dentists and physicians. In addition, there are indications in the market that an owner of an existing large medical office building has plans to redevelop their property for another use. Should that happen, there will be ample demand for your proposed project.

Based on the aforementioned, coupled with our confidence in you and your development team's demonstrated track record of success in real estate development, we are supportive of your efforts and would be very interested in providing financing for your project, subject to our credit underwriting guidelines.

We look forward to working with you and your team to help make your proposed medical office project a reality in the near future.

Sincerely,

Arnold Martines

Senior VP and Division Manager

Commercial Real Estate Lending

EXHIBIT 'A' BASIS OF BUDGET

GENERAL:

- G-1 Owner shall provide evidence of financial arrangements prior to the commencement of the Work, in accordance with Article 2.2.1 of the AIA A201 General Conditions.
- G-2 Owner shall defend, indemnify and hold harmless the PCL, Subcontractor, its employees and agents from and against damages, injuries, losses and expenses caused by the acts or omissions of the Owner and/or the Architect, including, but not limited to the Owner being the generator of hazardous materials.
- G-3 Bid is based on the Owner remaining the named generator of regulated (i.e. hazardous) waste associated with materials to be removed, transported and disposed of by PCL.
- G-4 Based on attached document list.
- G-5 Cutting and patching to match existing finishes will match as closely as reasonably possible, but some differences may exist.
- G-6 This budget is based on constructing the Innovation Hale concurrently.
- G-7 Based on information presently available and furnished to NPCL by the Owner, Architect and/or others and various assumptions which have been made as to facts not yet known, this construction cost estimate has been prepared and furnished for the sole purpose of providing approximation of anticipated construction costs. This construction estimate should not, at this time, be relied upon as a commitment that the contemplated project can or will be constructed for the estimated cost.

DIVISION 2:

- 2.1 An allowance of \$100,000 is included for jet grout columns of the sewer connection.
- 2.2 Plain concrete paving is assumed for hardscape.
- 2.3 Chemical treatment for termites is included.

DIVISION 3:

3.1 To expedite this budget, the concrete budget has been established using historical cost based on building areas. NPCL will confirm the concrete budget once a detailed takeoff and pricing of the concrete has been completed.

DIVISION 6:

- 6.1 The reception counter has been included as an allowance of \$10,000.
- 6.2 Counter tops at the bathrooms and Break Room are assumed to be solid surface material.
- 6.3 Base and wall cabinets at the Break Room are assumed to be plastic laminate.

DIVISION 7:

7.1 The sunshade is included as an allowance of \$6,250.

DIVISION 9:

9.1 Ceramic tile at restroom walls is assumed to be to a height of 5'-0".

ENTREPRENEUR'S SANDBOX Basis of Budget

DIVISION 10:

10.1 A projection screen at the Digital Media room is included as an allowance of \$5,000.

EXCLUSIONS: The following items are specifically excluded:

- EX-1 Design responsibility and insurance related requirements that are not clearly identified in the contract documents.
 - EX-2 Owner shall purchase Builders Risk Insurance in the form of all risk coverage, including, but not limited to earthquake, flood, and coastal windstorm with limits equal to the Contract Price.
 - EX-3 Impacts to the Contract Price and Contract Time for unforeseen conditions, including but not limited to hazardous materials.
 - EX-4 Air travel and associated expenses to various production plants, if required by owner.
 - EX-5 Appliances.
 - EX-6 A/E design fees.
 - EX-7 Testing and special inspections costs and fees.
 - EX-8 Legal and Title costs and real estate taxes and fees.
 - EX-9 FF&E.
 - EX-10 Easements and associated fees.
 - EX-11 Environmental impact assessment costs or fees.
 - EX-12 Green building classification and standards for LEED Certification.
 - EX-13 NPDES permit and costs.
 - EX-14 Incoming utility fees and assessments.
 - EX-15 Development permits.
 - EX-16 Water facilities charges
 - EX-17 Air rights and easements.
 - EX-18 Re-alignment of city sewer easements.
 - EX-19 Site survey and monitoring of adjacent properties.
 - EX-20 Archaeological site survey, monitoring, protection, relocation cost and time impacts.
 - EX-21 City and/or development of offsite traffic impacts.
 - EX-22 Preconstruction fees.
 - EX-23 Aerial Photos
 - EX-24 Sewer access charges.
 - EX-25 Building Permit
 - EX-26 Fireproofing of the structural steel and metal deck.
 - EX-27 PV panels
 - EX-28 Termimesh for termite control.

EXECUTIVE SUMMARY

Project Objectives

Colliers International Hawaii Research and Consulting ("Colliers") was engaged by Stanford Carr Development to conduct an office condominium market assessment and pricing study for their proposed Entrepreneur's Sandbox and Innovation Center Development ("Subject Property") adjacent to the existing UH Medical Center in Kakaako Waterfront Park.

Scope of Work

- Describe and analyze current and projected office market conditions for the Kapiolani/King/Kakaako office submarket for both fee simple and leasehold condominium product types.
- Identify competitive office condominium projects and review historical office condominium sales transactions and annual absorption rates.
- Identify market pricing for fee simple office condominiums and recommend pricing for leasehold office condominiums.
- Create an office condominium demand model to estimate square footage demand.
- Identify appropriate condominium unit sizes for the Project with primary consideration for medical and dental tenants in the Kapiolani/King/Kakaako office submarket.
- Recommend best case scenarios for office condominium development, including square footage of
 office space condominium demand, unit pricing, unit sizes, annual absorption and medical/dental
 demand levels.

Summary of Findings/Recommendations

To determine the demand for office condo product for the subject property, Colliers examined a database of doctors and dentists in urban Honolulu. Unit sizes were analyzed based on a projected number of employees per office. Colliers also reviewed more than 600 office condo sales since 2003 to determine the potential pricing of the condo units. Our findings are shown below:

- Number of Units: 43 units (73,100 square feet)
- Gross Building Size (excluding parking): 86,000 square feet
- Unit Sizes:
 - 1,000 square feet
 - 2,000 square feet
 - 5,000 square feet
- Average Pricing: \$613 per square foot

Oahu Office Market Overview

The Oahu office market is comprised of roughly 14.5 million square feet of inventory of Class A, B and C properties. Class A buildings are typically high-rise (more than 15 stories) properties built after 1985 with onsite parking and retail/personal service amenities. Class B buildings were built prior to 1985, and have limited tenant amenities. Class C buildings were also built before 1985 and are usually below five stories in height and do not have on-site parking or amenities.

The Central Business District ("CBD") is home to nearly 50% of the total office inventory and continues to be the home for many of the island's major businesses. This is the primary submarket for Honolulu County's office market with more than 7.1 million square feet of inventory. The Kapiolani/ King/ Kakaako ("KKK") Corridor includes office buildings located between the CBD and Waikiki. The KKK corridor is the second largest submarket with 3.56 million square feet of office properties. All of the remaining submarkets are less than 1.0 million square feet of office properties and correspond to the various suburban office markets throughout the island of Oahu.

Office Condo Market Defined

The urban Honolulu market is comprised of ten office condominium projects with a total of approximately 923,000 square feet of gross leasable area. The estimated vacancy rate of 5.6% for these office condominiums is well below the island-wide vacancy rate for "for lease" buildings which was 12.69% at year-end 2015.

This small market size is directly related to the lack of new development of office condominiums in this market. In fact, between 2003 and 2016, there were no new office condominiums built. There were three 'for lease' office buildings that were converted into office condominiums. In 2004, 1100 Alakea was converted into Alakea Corporate Tower as an office condo. In 2010, the Hawaii Times Building was converted into an office condo and in 2012, Newtown Square in Pearl City, was converted into the Mary Savio Medical Plaza office condo complex. These projects serve as a meaningful part of our demand and pricing analysis.

Building Name	Building Address	Building Location	Building Class	Year Built	Rentable Building Area (sf)	4Q2015 Available Space (sf)	4Q2015 Occupancy Rate

Source: CoStar, Colliers International

Office Condo Sales

Colliers compiled 629 office condominium sale transactions from 2003 to 2016. The average annual number of fee simple office condos sold was 24, and similarly, the average number of leasehold office condos sold was 25 per year. Detailed summary tables for leasehold and fee simple properties are provided in the appendix.

Unit Sales 38 55	\$7,840,342	Sold (sf)	Size (sf)	Square Foot

Office Condo Sales Prices

Colliers evaluated three data sets to determine the pricing for a medical office condominium at Kakaako Waterfront Park.

The initial analysis involved taking all fee simple condo sales and estimating an average price. At year-end 2015, office condos averaged \$484.76 per square foot per month. On average, leasehold condo prices sold at a 44% discount to fee simple prices and were \$306.05 per square foot in 2015.

The growth in sales prices for fee simple office condos rose at a pace of 7.95% per year for the past twelve years while leasehold prices increased 8.66% annually.

	LU OFFICE ER SQUAR		SALES
Year	S Fee Simple	ALES PSF Leasehold	Total
2003	\$250	\$193	\$227
2004	\$300	\$121	\$246
2005	\$302	\$103	\$180

Honolulu Office Condo Sales Per Square Foot (FS)

Commercial Condos in New Build Residential Buildings

Typically, new condominium projects would be priced higher than the older existing stock. Despite not having any new office condo developments as comparables, there were several new high-rise residential developments that incorporated ground floor commercial condos into their projects. These units were mostly acquired by retailers for prices in excess of \$600 per square foot. The Keola Lai project sold its ground floor retail condos for an average of \$641 per square foot. The 909 Kapiolani residential condo project sold its ground floor condos for an average price of \$695 per square foot.

New Build Residential - Commercial Condos				
Property	Year of Sale	Avg. Sales/SF		
Keola Lai	2011	\$603		
909 Kapiolani	2007-2009	\$695		

Source: Data compiled from public records

Office Condo Conversion Projects

Lastly, we looked at pricing for the three condo conversion projects and determined that for 2015 Alakea Corporate Tower price per square foot rose to \$506. This was followed by transactions at the Mary Savio Building which posted a year-end price of \$504. The Hawaii Time Building 's price per square foot fell significantly in 2015 to \$183 psf.

Condominium Conversions				
	2015 Price/SF			

Hawaii Times Building \$183

Mary Savio Building \$504

Alakea Corporate Tower \$506

Section 1: MARKET OVERVIEW

Medical Office Space Infrastructure and Improvements

According to discussions with Colliers office leasing specialists, while traditional office build-outs are in the \$65 to \$75 per square foot range, medical and dental space build-outs are likely around \$150 to over \$250 per square foot. For users with specialized equipment, such as surgery centers and so on, these numbers can be even higher. However, most of the medical office users, especially dentists, would expect to have the space delivered in a vanilla shell condition, with the landlord covering the costs of demising walls, ceiling grid, HVAC and utilities available and stubbed. At the Hale Pawaa medical office building (which was the last office building to be developed), the landlord was reportedly willing to pay \$10 per square foot under a 7-year lease term.

Most dentists are wanting a minimum of three operatories with the ability to have a fourth one plumbed. Most dentists are spending more on FF&E versus improvements as many vendors are now making movable equipment and counters, which also function as demising/partition walls. A typical dentist office will now have a waiting area, an office, and a client consultation room with an open layout.

Some of the key issues that need to be addressed with medical/dental office users are:

- Sufficient parking for patients and staff which is likely higher than the traditional office user ratio of 1/400 square feet.
- Natural light from windows, since it helps with color and shade match.
- Dental uses have a higher water usage. They require more water fixtures than general medical
 office users
- Dental offices use sterilizers, compressors, vacuums, xray machines, and other specialized equipment so they require a larger electrical panel.

Section 1: MARKET OVERVIEW

Parking Rates

Typical parking ratios for office buildings are 1 stall per 400 to 500 square feet of office space. Parking rates vary per building but averaged \$4.07 per hour with monthly stall rates averaging from \$126 (unreserved) to \$173 (reserved). While hourly rates are shown, most of the buildings offer ½ hour rates as well at half the hourly rates.

	Hourly		Monthly	
		Validation		
	Per Hour	Books per 100	Unreserved	Reserved
dale Pawaa	1st hour free/\$1.00/Half Hour Thereafter	\$0.75/hour	\$100	n/a

Section 2: PRICING ANALYSIS

Pricing Analysis

In order to estimate the potential pricing for a medical office condo unit at the subject site, Colliers analyzed the condo conversion and new build commercial condos in residential condos, as well as total fee simple office condo pricing. A weighted average and discounted average of these sales prices were used.

Taking into account condo pricing for condo conversions, new build residential condo ground floor units, and the 2015 average for all fee simple condos, we determined that a general office condo would sell for roughly \$490 per square foot.

We believe that an enhanced building infrastructure that would accommodate medical tenants could warrant a 25% premium above this price.

Colliers believes that this market could support specialized medical condo prices within the \$600 to \$625 per square foot price point.

PRICING ANALYSIS Condominium Convers	sions		Weighted
	2015 Price/SF	Weighting	Price/SF
Hawaii Times Bullding	\$183	10%	\$18

Section 3: CONDO SIZE ANALYSIS

Condo Size Analysis

The 623 office condo sales transactions that were compiled for this study were categorized by unit size (square feet). More than 71.5% of these condo were less than 1,000 square feet in size and only 14.4% were larger than 2,000 square feet.

OFFICE CONDO SQUA		NATE
Unit Size (square feet)	Units Sold from 2003 to 2015	Percentage of Total Units Sold
<500	221	35.5%
500-1000	224	36.0%
1000-2000	88	14.1%
2000-4000	53	8.5%
4000+	37	5.9%
Total	623	100.0%

Source: GIS data compiled from MapInfo Pro.

To corroborate this condo size estimate, a list of dentists and doctors that work in urban Honolulu was obtained. Colliers segmented this data by the number of employees. Similar to the historical office condo comp estimate, nearly 60% of these offices are for very small practices which employ three or fewer employees. To accommodate these practitioners, condo units would have to be sized below 1,000 square feet.

OFFICE CONDO SQUARE FOOTAGE ESTIMATE (BY NUMBER OF MEDICAL OFFICE EMPLOYEES)					
Number of Employees	Number of Offices	Percentage of Total			
1 to 3	643	59.7%			
4 to 7	335	31.1%			
8 to 12	51	4.7%			
13+	48	4.5%			
Total	1,077	100.0%			

Source: GIS data compiled from MapInfo Pro.

Colliers concluded that both the historical sales comparables and the medical practitioner business database corroborated how the proposed office condominium should be categorized. Roughly 60% of the units would be for small practitioners, followed by larger units that could accommodate staffs up to 7, and larger units for practices employing up to 25 to 35 people.

FFICE CONDO SIZE RECOMMENDATIONS		
Percentage of Units	Unit Size (sq. ft.)	
60%	1,000	
30%	2,000	
10%	5,000	

Section 4: UNIT DEMAND ANALYSIS

Unit Count Estimates

There are several factors that will directly influence the demand for office condos. In addition to both real estate and financial market external impacts such as interest rates and economic conditions, the possibility of the General Growth Properties redevelopment of the Ala Moana and Ala Moana Pacific Buildings into residential condominiums would be a primary demand generator.

The success of One Ala Moana and the Park Lane high-rise luxury residential condominiums resulted in a redevelopment clause being added to Ala Moana Building and Ala Moana Pacific Building tenant leases. While there was a delay in implementing an original plan to not renew expiring tenants beyond 2019, the redevelopment clause still remains in these leases.

Colliers has incorporated into the following demand estimate, a conservative, a moderate and an aggressive development scenario. The conservative estimate is based on existing demand projected without any changes to historical trends. The aggressive scenario takes into account the implementation of General Growth Properties plan to redevelop their office buildings.

Based on these scenarios, the number of recommended units ranges from a minimum of 25 units (42,500 square feet) and up to 62 units (105,400 square feet).

N	CONSERVATIVE S O REDEVELOPME	
Unit Size	Number of Units	Total Square Feet
1,000 SF	15	15,000

MODERATE SCENARIO MIDPOINT			
Unit Size	Number of Units	Total Square Feet	
1,000 SF	26	25,800	
2,000 SF	13	25,800	
5,000 SF		21,500	
Total	43	73,100	

AGGRESSIVE SCENARIO REDEVELOPMENT BY GGP			
Unit Size	Number of Units	Total Square Feet	
1,000 SF	37	37,200	
2,000 SF	19	37,200	
5,000 SF	6	31,000	
Total	62	105,400	

Section 5: FINDINGS AND RECOMMENDATIONS

MARKET CONDITIONS: FAVORABLE

Oahu's office condominium market posted a vacancy rate of 5.6% and has outperformed the "for lease" office market which has a year-end 2015 vacancy rate of 12.7%. Healthy job growth fueled by the professional business services and the healthcare sector has boosted office space demand. Despite this demand for office space, the "for lease" market remains stagnant. Demand for office condos has remained flat, averaging roughly 50 unit per year. The belief is that the lack of new inventory has prevented much needed growth for this market sector. Over the past twelve years, there have only been three office building condo conversions that have occurred, and these projects were quickly absorbed within two years of the conversion date.

CONDOMINIUM PRICING: \$600 to \$625 PER SQUARE FOOT

Colliers looked at three different sales transaction categories for the price analysis; historical office condominium sales, condo conversion sales, and commercial condo sales at residential condominium projects. All three conclude that prices for office condominiums have risen in 2015 to an estimated price of \$490 per square foot. By incorporating medical office infrastructure to accommodate doctors and dentists, Colliers believes an associated premium of 20% could be added to the pricing for a concluded average price of \$613 per square foot.

A buy versus lease analysis was performed for a 1,000 square foot unit at a price of \$613,000 to check the affordability of a unit at that pricing. Improvement costs of \$150 per square foot were also considered. Occupancy costs were compared over a 10-year period with the assumption that the buyer sells the unit in year 10 at an appreciated value (5% per year). However, it is more likely that the medical office condo owner would have a longer holding period to amortize improvement costs. The results were lower occupancy costs considering the equity appreciation of the condo. The full analysis is provided in the appendix.

DEMAND ANALYSIS: 25-62 UNITS

Historical office condo sales reflect that roughly 50 office condos (leasehold and fee simple) trade hands on an annual basis. The lack of inventory dictates the lack of transaction volume. Colliers corroborated data from both historical office condo transaction activity and a medical practitioner database to determine the size of the units and the allocation of these units by square footage.

The uncertainty of General Growth's plan to redevelop their office buildings (Ala Moana Pacific Center and Ala Moana Building) resulted in a wide variance in the demand levels for these proposed units from 25 to 62 units.

Section 5: FINDINGS AND RECOMMENDATIONS

DEVELOPMENT RECOMMENDATIONS

As a result of the various development scenarios, we recommend the moderate scenario for this planned development. If we assume a 15% load factor, the estimated total building size (excluding parking) would be approximately 86,000 square feet.

MODERATE SCENARIO MIDPOINT		
Unit Size	Number of Units	Total Square Feet
1,000 SF	26	25,800
2,000 SF	13	25,800
5,000 SF	4	21,500
Total	43	73,100
