- Honolulu Int'l Airport

Values that Build. Since 1947.
1. HUNT ACTIVITY TO DATE IN KALAELOA

BRINGING AFFORDABLE HOUSING TO KALAELOA

Hunt renovated former military housing, brought to market 520+ homes in 2005, and an additional 100 affordable units at Wakea Garden Apartments in 2015.

**Orion Housing, Orion Park and Makai Housing**
Renovated former housing on the former Barbers Point Naval Air Station.

**Wakea Garden Apartments**
Renovated former Bachelor Officer Quarters into 100 1-bedroom affordable apartments.
1. HUNT ACTIVITY TO DATE IN KALAELOA
CREATING A JOB CENTER

Hunt’s revitalization of their Kalaeloa properties has generated 500+ jobs, a number that continues to grow.

Hawaii State Federal Credit Union (HSFCU)
HSFCU relocated their call center from Honolulu to Kalaeloa bringing 40+ employees to the district.

Various Light Industrial Tenants in Kalaeloa
2. MASTER PLANNING: HCDA MASTER PLAN UPDATE

- **Major HCDA Milestone:**
  $500K Funding approved in July 2018 for HCDA to update KMP and associated regulations.

- **Timing:**
  HCDA to commence before July 2020 in order to retain funding.

- **Considerations:**
  - Hunt Master Plan update to dovetail with HCDA’s update.
  - KMP/associated regulations update will be informed by Hunt’s ongoing subdivision and planning programs.
  - Current subdivision application will expire in February 2020 (final extension).
  Implications of not obtaining subdivision:
    - Slows progress of bringing 1000+ homes to Kalaeloa.
    - Delays infrastructure availability in the western portion of Kalaeloa (including HECO power).
2. MASTER PLANNING
CONSIDERATIONS TO HUNT'S NEAR TERM SUBDIVISION PLANS

Kamokila Blvd. extension as tentatively approved by the City

DHHL Solar farm: Long term 20-year lease to 2032, with option for 35-year extension
2. MASTER PLANNING

CONSIDERATIONS TO HUNT'S NEAR TERM SUBDIVISION PLANS

Roadway Master Plan Update (Fehr & Peers)
- Master Plan based on Updated Existing Traffic Counts and Full HCDA & Hunt Buildout
- Roadway MP ROW meets City and County of Honolulu Subdivision Standards
- City and County will own and maintain roadways if City Standard ROWs are constructed as shown below:

- = 4 Travel Lanes
- = Emergency Access Connection
- = Bicycle Lanes
- = Bicycle Path

XX” = Right-of-Way Width as shown in 2012 HAR Ch. 215 Thoroughfare Plan

Values that Build. Since 1947.
3. KEY CHALLENGES IN KALAELOA
INFRASTRUCTURE RELIABILITY

WATER AND WASTEWATER
• Owned and operated by U.S. Navy until December 2017, when Hunt acquired the water/wastewater system after a years’ long process.
• Private ownership allows Kalaeloa landowners to hook into the water and wastewater system and improved reliability as a result of investment in capital improvements.

ELECTRICAL SYSTEM
• Currently owned and operated by Navy; no new connections allowed.
• Major reliability issues (3+ week outage June-July 2019)
• New Energy Corridor lessens the load on Navy system, but does not promote growth of Kalaeloa.
### 3. KEY CHALLENGES IN KALAELOA: INFRASTRUCTURE FUNDING

Based upon the Ewa highway master plan, the Ewa highway impact fee program, the Oahu regional transportation (Top 2025) plan, the Ewa development plan, and other policy considerations, the portion of the estimated cost of Ewa highway master plan improvements attributable to new development and to be collected by this impact fee ordinance is $38,792,880.
FORD ISLAND

Master Development Agreement

Pearl Harbor, Hawai‘i

Honoring the Past, Preparing for the Future

"The Ford Island Development Project is an excellent example of what can be achieved when the public and private sectors partner together. The project will not only improve the quality of life for our sailors and their families, it will also add jobs and a shot in the arm for our local economy."

- U.S. Senator Daniel K. Inouye
2009

"The Ford Island Master Development Agreement is a hallmark asset management accomplishment that set expanded framework for all of DoD to pursue facilities and infrastructure projects through enhanced use lease and other public/private venture arrangements. By leveraging a mix of out-leases and fee conveyances of former Navy-utilized property around Pearl Harbor, Ford Island realized more than $80M in privately financed construction, while allowing Hunt to successfully develop Waikiki Bluff & Gulch, Iroquois Point, and Barbers Point."

- Joe Calcara, Deputy Assistant Secretary of the Army (Installations, Housing and Partnerships)
2011

A unique public-private partnership between the U.S. Navy and Ford Island Properties, LLC (a joint venture between Hawai‘i Renaissance Builders, LLC [an affiliate of Hunt Companies, Inc.] and Fluor Federal Services, LLC) has enabled the redevelopment of Ford Island into an efficient living and working environment adjacent to the main Naval Station Pearl Harbor.

Under the Ford Island Master Development Agreement (MDA), the U.S. Navy exchanged 1,600 acres on five parcels of land throughout O‘ahu (including 1,988 family housing units) for significant infrastructure and other improvements on Ford Island. This unique project has resulted in a better quality of life for Navy personnel and substantial improvements to formerly under-utilized land throughout the community.
• Designed the Ford Island Historic Trail, a 4.5 mile interpretive trail which will showcase major events that occurred on Ford Island on December 7, 1941.

Since 2003, Hunt has managed the following projects on off-base properties:

• The Waterfront at Pu‘u‘o‘a (formerly known as Iroquois Point), a highly successful ocean front rental community for civilians and military members located at the mouth of Pearl Harbor. All of the 1,461 homes at The Waterfront have been renovated.

• Renovation of 280 homes at the former Barbers Point Naval Air Station (now called “Kalaeloa”). These as well as 235 other former military homes at Kalaeloa were privatized and now provide affordable housing to military and civilians in West O‘ahu.

• The Waikiki Naval Ammunition Depot, a 515 acre former Navy Weapons Station has been converted into a thriving commercial/industrial storage and self-storage park, consisting of over 500,000 square feet of indoor storage and 30,000 square feet of office space. Waikiki represents a successful adaptive reuse project for Hunt and the Navy, resulting in a substantial increase of the property’s value.

• 548 acres of underutilized land and abandoned buildings at Kalaeloa. The former Barbers Point Naval Air Station is undergoing a dramatic revitalization and repositioning as a new fully-serviced community with mixed use developments including residential, retail, commercial and industrial spaces as well as recreational facilities to help meet the short and long term needs of the West O‘ahu area.

INNOVATION

The partnership between Ford Island Properties and the Navy was unprecedented and was made possible through special legislation passed by Congress in 1999. The land exchange which enabled the Navy to sell five underused properties in exchange for in-kind construction and infrastructure repairs on Ford Island highlights Hunt’s partnership approach and ability to respond to changing circumstances to achieve a better outcome for all parties. This unique public-private partnership has since been used as a model across the country.

In 2004, Ford Island Properties joined with union and non-union labor organizations to sign the Aloha Stabilization Agreement, a first-of-its kind project labor agreement that ensured jobs for local workers. The Aloha Stabilization Agreement established a level playing field with a uniform set of rules and common ground for dispute resolution.

This unique public-private partnership provided for the immediate and future development of Ford Island without using taxpayers dollars/Congressional appropriations.
