

Ashley Langworthy

Vice President

Ashley is the Vice President of Biederman Redevelopment Ventures, and is located in Seattle. With 20 years of experience, Ashley is instrumental in activating, developing, and rehabilitating complex urban projects. Ashley has extensive project management experience overseeing urban redevelopment projects with multiple consultants and significant community outreach.

At Salesforce Transit Center in downtown San Francisco, Ashley oversees the BRV team to manage, operate, and activate the public rooftop park. The rooftop park features extensive gardens and horticultural beauty, as well as a highly activated amphitheater, central plaza, and children's play area.

Ashley is managing a team to update the Master Plan for Dallas' culturally and historically significant Fair Park. In addition to the Master Plan, Ashley is developing and implementing a new community park within Fair Park, which will meet the recreational needs of the neighborhood. The community park will be the first new design and construction project in Fair Park following the Master Plan Update.

Ashley is collaborating with the City of Seattle and the Downtown Seattle Association to help revitalize downtown Seattle with placemaking and activation efforts. BRV is providing programmatic, design, and management recommendations to lift up these spaces and help downtown Seattle be a safe, beautiful, active, and welcoming district for all.

Ashley is an active member of Lambda Alpha International and the Urban Land Institute. Ashley serves on ULI's Sustainable Development Council, NEXT Steering Committee, and Policy and Practice Committee.

Prior to her work at BRV, Ashley spent 10 years as a Senior Associate with SWA Group in their San Francisco office. Ashley is a licensed Landscape Architect and an AICP Certified Planner.
