The U.S. Department of Housing and Urban Development (HUD) sets income limits that determine the eligibility of applicants for its assisted housing programs. HUD typically uses the Very Low-Income Limit (VLIL) as the basis for deriving other income limits. The VLIL is calculated by taking the 4-person income limit equal to 50% of the estimated median family income (based on the U.S. Census Bureau's ACS median family income estimates) and making adjustments if this income is outside formula constraints. For example, the VLIL is increased for areas where rental housing costs are unusually high in relation to the median income or if it is less than the relevant State non-metropolitan median family income level. See "FY 2017 HUD Income Limits Briefing Material" at <https://www.huduser.gov/portal/datasets/il/il17/IncomeLimitsBriefingMaterial-FY17.pdf>

HHFDC uses the HUD income limits for households at the 50% and 60% income limits as calculated for the Multifamily Tax Subsidy Project (MTSP) charts. For HHFDC programs, the 80% income limit is calculated as the Multifamily Tax Subsidy Project (MTSP) VLIL for FY 2017, multiplied by 1.6 (or 80/50). The limits for households at other income limits are calculated in the same way. For further information see "Multifamily Tax Subsidy Income Limits" at <https://www.huduser.gov/portal/datasets/mtsp.html>
